

Draft
Political Resolution for 24th Congress
(Adopted at the Central Committee Meeting held on
January 17-19, 2025 at Kolkata)

Introduction

1 **0.1** The period since the 23rd Congress was marked by a growing
2 conflict between the forces of the Hindutva-corporate regime,
3 represented by the Modi government and the secular-democratic
4 forces who were opposed to it. The push to impose a reactionary
5 Hindutva agenda and the authoritarian drive to suppress the
6 opposition and democracy displays neo-fascist characteristics.
7 The CPI(M) and the Left parties consistently opposed the
8 communal-corporate policies of the Central government.
9 Workers, peasants and other sections of the working people
10 waged united struggles to defend their livelihoods and economic
11 rights.

1 **0.2** The Lok Sabha election of May 2024 resulted in a setback
2 for the BJP; it lost its majority in the Lok Sabha and faces a
3 strengthened opposition in Parliament. However, the third term
4 of the Modi government is seeing a continuation of the Hindutva
5 neo-liberal agenda of the BJP-RSS. The results have opened
6 up space for wider resistance to the pro-corporate Hindutva
7 policies of the Modi government, both outside and inside the
8 Parliament.

1 **0.3** In the past three years, the Modi government has reinforced
2 its strategic ties with the United States. Foundational agreements
3 for military collaboration have been completed and it is
4 increasingly aligned with US geopolitical interests in the Asia-
5 Pacific region, as seen in its participation in the QUAD and its
6 shameful support for Israel’s genocidal war on Gaza. All these
7 developments must be seen in the context of global developments
8 and geopolitical relations, which have a direct bearing on our
9 national situation.

International Situation

- 1 1.1 The main trends in the international situation since the 23rd
2 Congress are:
- 3 (i) US imperialism is involved in the two major conflicts
4 taking place in the world since the 23rd Congress. It is
5 actively supporting Israel in its aggression against Gaza,
6 which has led to the deaths of tens of thousands of people,
7 and it is lethally arming and supporting Ukraine in the war
8 with Russia;
 - 9 (ii) As a consequence of the systemic crisis, the global
10 economy is witnessing sluggish growth, with inequalities,
11 poverty, unemployment, hunger and malnourishment on the
12 rise;
 - 13 (iii) Working-class struggles in defence of their rights and
14 against economic hardships are taking place in many
15 countries, including developed countries; however,
 - 16 (iv) The political rightward shift, noted earlier, continues,
17 with many countries witnessing the election of far-right
18 political parties to seats of power. However, during this
19 period, the Left made gains in Colombia, Brazil, Mexico,
20 Uruguay and Sri Lanka;
 - 21 (v) The conflict between the US and China is intensifying;
 - 22 (vi) Socialist countries are effectively resisting imperialist

- 23 attacks;
- 24 (vii) Protests against imperialism, war and aggression are taking
25 place everywhere;
- 26 (viii) The failure of governments to act on promises to tackle
27 climate change is leading to drastic changes and causing
28 severe losses to the people, particularly in the Global South;
- 29 (ix) Our neighbourhood witnessed intense popular protests that
30 led to the fall of elected governments;
- 31 (x) India's isolation in the neighbourhood continues.

Israeli Genocide in Palestine

1 **1.2** Israel carried on its genocidal onslaught on Gaza for fifteen
2 months after the Hamas attack on October 7, 2023. Until
3 the ceasefire was announced, 47,035 Palestinians were
4 killed and a hundred thousand injured in the brutal Israeli
5 aggression. Nearly 60 per cent of those killed are women
6 and children. Israel violated all international laws with
7 impunity by attacking schools, hospitals, UN refugee
8 shelters and unarmed civilians. It used drones, banned
9 weapons and carried out targeted assassinations. With a
10 complicit US administration and its allies, Israel intends to
11 occupy the West Bank.

1 **1.3** Israel is able to carry out its destruction of Palestine and
2 attack many countries in West Asia due to the support it is
3 receiving from the US. The US has increased its arms
4 exports to Israel since 2023. The monetary aid extended by
5 the US also saw a five-fold increase, from \$3.6 billion to
6 \$17.9 billion. The US vetoed all resolutions demanding an
7 immediate ceasefire moved in the UN. Together, they
8 ignored the International Court of Justice (ICJ), which ruled
9 Israel's actions as leading to genocide. It is in the interests
10 of the US to ensure that a strong Israel emerges from this
11 conflict, as that would ensure its hegemony is retained in
12 West Asia.

1 **1.4** Israel expanded the area of conflict by attacking Lebanon,
2 where more than 3,700 people died before a ceasefire was
3 declared. It has bombed Syria, Yemen, Iran and Iraq. The
4 US and UK have also joined in attacking Yemen and
5 supported Israel's attack on Iran. Top Iranian generals were
6 killed inside Iran and Syria.

1 **1.5** Israel's assault on Gaza halted temporarily with the
2 announcement of a ceasefire, which will be implemented
3 in three phases. Within 24 hours of the announcement, Israel
4 declared that it retains the right to attack Gaza at any time,
5 exposing the precariousness of the ceasefire deal.

Syria: Fall of Assad

1 **1.6** The fall of Bashar al-Assad's regime in Syria will have
2 major repercussions. The end of the last remaining secular
3 state in West Asia is going to destabilize the region and
4 increase sectarian strife. The Islamist Hayat Tahrir al-Sham
5 (HTS), which led the armed attack against Assad, has
6 formed the government. Though it promised to protect the
7 interests of various religious minorities, the reality is
8 different, with reported attacks on minorities. Many of them
9 are migrating from Syria, fearing further attacks. HTS, Israel
10 and Turkey are in the process of carving Syria into their
11 respective spheres of influence. Israel crossed the buffer
12 zone in the Golan Heights and stationed its troops. Turkey
13 wants to control the border regions and ensure that the Kurds
14 are suppressed. On the other hand, the US and its allies,
15 which were supporting the Kurds, are trying to normalise
16 relations with HTS to serve their imperialist interests. Given
17 the US history of promoting religious fundamentalist and
18 extremist forces that are threats to secular States, this is
19 not unexpected.

War in Ukraine

1 **1.7** The Russia-Ukraine war saw an escalation of attacks on
2 both sides, with the US permitting Ukraine to use long-
3 range missiles inside the territory of Russia. Russia declared

4 that it considers such attacks a direct attack from NATO
5 countries and threatened to use nuclear weapons. Despite
6 all the support given by the United States and NATO in
7 terms of weaponry and finances, Ukraine is unable to push
8 back the Russians from eastern Ukraine or even hold its
9 frontline positions. Russia has increased its territorial grip
10 in the Donbas and is advancing steadily into the eastern
11 regions of Ukraine. The US is using Ukraine to advance its
12 goal of weakening and containing Russia.

1 **1.8** All the economic sanctions that were imposed on Russia
2 by the US and its allies failed to cripple the Russian
3 economy. Russia was able to escape from the net of
4 sanctions because of its close relations and trade with many
5 developing countries, particularly China and India. Trading
6 in local currencies and supplying cheap fuel also enabled
7 Russia to retain its market share and overcome the impact
8 of sanctions. All these factors exposed the failure of
9 sanctions as a weapon to confront a major economy like
10 Russia. On the other hand, the ban on the purchase of fuel
11 from Russia has badly affected European countries. The
12 rise in the price of gas and food grains added to the burdens
13 of the people.

Asia-Pacific Region – Increasing Tensions

1 **1.9** The US moves in the Asia-Pacific region are creating
2 tensions due to the increased presence of its navy and
3 military exercises as part of its efforts to contain and isolate
4 China. The United States is trying to strengthen its military
5 alliances (defence pacts) with the countries in the region.
6 It began deploying a new, offensive intermediate-range land-
7 based missile system in the region. The US is blatantly
8 interfering in China's internal affairs by arming Taiwan and
9 extending open support to the forces of secession.

1 **1.10 Korean Peninsula:** The situation on the Korean Peninsula,
2 provoked by the United States, continues to be tense,
3 seriously affecting the security of the region. The US, Japan

4 and South Korea have strengthened trilateral military
5 cooperation and are conducting intense joint military
6 exercises. North Korea (DPRK) has changed its policy on
7 relations with South Korea and declared that North and
8 South Korea are no longer people of the same nation but
9 are enemies and warring parties. The relations between the
10 two sides have dropped to a historic low.

1 **1.11** The main targets for the US in this region are clearly China,
2 North Korea and Russia, which are officially designated as
3 a 'Revisionist Power' (China), a 'Malign State' (Russia)
4 and a 'Rogue State' (DPRK).

1 **1.12** The US is trying to impose its hegemony over the entire
2 world despite the weakening of its economy. Its involvement
3 in Ukraine and West Asia has shown the limitations of its
4 military prowess. On the other hand, the strong partnership
5 between Russia and China and the rallying of many
6 developing countries behind them have further exposed the
7 weaknesses in the US armour. The US is trying to counter
8 the growing assertion of Russia and China by strengthening
9 its alliances like the G-7 and NATO and also by trying to
10 form many new alliances. The world is gradually being
11 pushed into two conflicting groupings, raising the curtains
12 for another Cold War.

1 **1.13** In the 23rd Congress, we noted that differences remain
2 among imperialist countries despite the efforts made by the
3 US administration to rally its allies against Russia and
4 China. During this period, using NATO and the G-7, the
5 US was able to rally its allies against Russia and China and
6 moved towards resolving these differences. Both NATO
7 and the G-7 declared that China and Russia are countries
8 of concern that need to be contained. Thus, inter-imperialist
9 contradictions continue to remain muted. With Trump
10 assuming the US presidency, there is a possibility of strains
11 developing once again between the imperialist countries
12 due to his policies on climate change, European alliance
13 and NATO.

Growing Military Expenditure

1 **1.14** Global military spending in 2023 grew for the ninth straight
2 year to stand at \$2.44 trillion. The US continues to be the
3 largest spender on defence and together with its NATO
4 allies, constitutes more than half of global military spending.
5 The US is reluctant to re-sign the expired nuclear deterrence
6 treaties. The New Strategic Arms Reduction Treaty (New
7 START), the last of the nuclear arms control treaties
8 between the US and Russia, is under suspension since the
9 war in Ukraine. The expiry of various arms control treaties
10 and the increased expenditure on developing new weapons
11 of mass destruction put the entire world in danger.

1 **1.15** Military coups and internal conflicts, leading to the
2 displacement of a large number of people, have increased
3 on the African continent. Since 2022, there were eight coups
4 in Africa, of which three were successful. More than 45
5 million people are displaced due to conflicts and social
6 unrest. 15 countries, forming the contiguous areas of the
7 Sahel region, Great Lakes and Horn of Africa are mainly
8 affected by these conflicts. Sudan is the worst hit country
9 among them, with a raging civil war. The US continues to
10 intervene in the internal affairs of many countries in Africa
11 through the AFRICOM, its military command centre. In
12 the last three years, France was forced to withdraw its troops
13 from its erstwhile colonies like Mali, Burkina Faso, Niger,
14 Chad, Senegal and Ivory Coast. People are protesting
15 demanding the withdrawal of foreign troops stationed in
16 their lands. Many countries in Africa want to diversify their
17 relations, which is resented by imperialist countries.

1 **1.16 Role of the UN:** The UN has failed to put an end to the
2 most violent conflicts that we face in Gaza, Ukraine, Sudan,
3 Congo, etc. It is becoming increasingly clear that real power
4 lies in the hands of those who wield political, military,
5 financial and veto power. Countries like the US and Israel
6 are doing whatever they want, including refusing to pay
7 their share of UN budgets and outlawing the very UN

8 organisations that have been commissioned to uphold
9 international law. The failure of the UN in the maintenance
10 of international peace and security is an expression of the
11 unequal power among its members. This calls for an urgent
12 democratisation of the UN and its various institutions.

1 **1.17 Move towards Multi-Polarity:** BRICS was expanded by
2 including five new members from different regions of the
3 world. The newly emerged BRICS Plus represents more
4 than half of the global population and 37 per cent of the
5 global GDP. These countries have decided to encourage
6 trade in their own national currencies and thus cut
7 dependence on the dollar for carrying out their trade. This
8 would be a blow to US imperialism and its dollar hegemony.
9 Many countries are showing interest in joining this grouping
10 and have applied to become members. As a step towards
11 further enlarging this group, some such countries are
12 allowed to associate as 'Partner States.' BRICS is not an
13 anti-imperialist platform but can well emerge as a
14 multilateral forum that can challenge the US-led uni-polarity
15 and work towards strengthening multi-polarity.

Global Economy

1 **1.18** A new normal characterised by sluggish growth has set in
2 for the global economy. According to the IMF, global
3 economic growth is projected to remain steady at 3.2 per
4 cent in 2024 and 2025. These rates are below those
5 registered in the years prior to the pandemic for both
6 developed and developing economies and are insufficient
7 to address economic, social, developmental and
8 environmental challenges. This is particularly concerning
9 for the 46 least developed countries and falls woefully short
10 of the targeted 7 per cent needed to realise the Sustainable
11 Development Goals.

1 **1.19 Rising Prices and Eroding Purchasing Power:** Inflation
2 continues to be a major concern for people around the world.
3 Consumer prices have risen by 4.3 per cent globally in 2024.
4 The rising consumer prices have eroded purchasing power

5 in both advanced and developing countries. In 2023, food
6 commodity prices remained high and it was only in
7 December 2023 that the UNCTAD food index declined
8 below its February 2022 level. Even that is about 20 per
9 cent above its pre-pandemic level. The prices of agricultural
10 commodities, such as oilseeds and oils, experienced similar
11 fluctuations, while the price of rice has not fallen below its
12 February 2022 level. Prices of fertilisers also rose above
13 pre-pandemic levels.

1 **1.20** The rise in inflation is due to a combination of factors,
2 including regional conflicts like in Ukraine, surging
3 commodity prices, heightened market concentration and the
4 pricing behaviour of large corporations, most notably agri-
5 food and energy corporations. There will be no relief from
6 higher commodity prices unless concerted actions to rein
7 in anti-competitive practices, abuse of dominant market
8 positions and corporate concentration in key sectors, along
9 with steps to curb financial speculation in agricultural
10 commodities, are undertaken.

1 **1.21 Attacks on the Working Class:** The effects of rising
2 commodity prices are severely felt by the working class, as
3 their real wages did not increase. A total of 791 million
4 workers have seen their wages fail to keep up with inflation
5 and, as a result, have lost \$1.5 trillion over the last two
6 years, equivalent to nearly a month (25 days) of lost wages
7 for each worker. The fall in wages is also visible in the
8 declining labour income share, which had fallen globally
9 by 0.6 percentage points from 52.9 per cent in 2019 to 52.3
10 per cent in 2022 and has since remained flat. While the
11 decrease appears modest in terms of percentage points, in
12 2024, it represents an annual shortfall in labour income of
13 \$2.4 trillion (in constant PPP) compared to what workers
14 would have earned had the labour income share remained
15 stable since 2004. Due to the gender disparity in wages,
16 women workers are facing even more hardships, as, for
17 every dollar that a man earns, women are earning only 51.8
18 cents.

1 **1.22** The fall in the labour share across both developed and
2 developing economies, together with the increasing
3 concentration of income at the higher end of the pyramid,
4 points to the fact that those at the lower end are bearing the
5 brunt of the reduction in the labour share. This is the main
6 reason for rising inequalities and is also leading to the
7 intensification of the contradiction between capital and
8 labour.

1 **1.23 Rising Unemployment:** The global unemployment rate is
2 around 5 per cent in recent years, with an extra two million
3 workers losing their jobs in 2024. The global youth
4 unemployment rate in 2023 is 13 per cent, or 64.9 million.
5 Nearly four-fifths of the youth who find a job are under-
6 employed, in insecure, casual employment, which is not
7 well-paid. Even among the one-fifth, many are employed
8 in contractual positions. The global incidence of youth not
9 in employment, education, or training (NEET) remains at
10 20.4 per cent in 2024. There are 27.6 million people
11 performing forced labour in the world and the capitalists
12 are earning \$236 billion as profits every year from forced
13 labour. 86 per cent of forced labour is in the private sector.
14 It becomes clear that capital wants labour at exploitative
15 wages and employs workers in those forms of labour from
16 which it can squeeze all their labour power.

1 **1.24 Gross Inequalities:** As of 2023, around 46 per cent of the
2 world's population, or over three billion people, are living
3 under the global poverty line of \$6.85 (2017 purchasing
4 power parity) per day. The gap between the Global North
5 and the Global South has grown for the first time in 25
6 years. Nearly 700 million people worldwide live in extreme
7 poverty, surviving on less than \$2.15 per person per day. In
8 2023, 10.7 per cent of the world population (864.1 million
9 people) was affected by severe food insecurity. Nearly 60
10 per cent of the people who go hungry are women and girls.
11 The climate breakdown is also contributing to an increase
12 in global inequality.

1 **1.25 Concentration of Wealth in Monopolies:** On the other
2 hand, concentration of wealth is taking place at an alarming
3 pace. The world's richest 1 per cent own more wealth than
4 95 per cent of humanity. Since 2020, the richest 1 per cent
5 have captured almost two-thirds of all new wealth – nearly
6 twice as much money as the bottom 99 per cent of the
7 world's population. Billionaire fortunes are increasing by
8 \$2.7 billion a day, even as inflation outpaces the wages of
9 at least 1.7 billion workers.

1 **1.26** The immense concentration of wealth is deeply intertwined
2 with increasingly concentrated monopoly power. A small
3 number of firms dominate key markets across the world,
4 including pharmaceuticals, agriculture and technology. The
5 top seven social media, tech and chip companies hold a
6 market capitalisation of around \$12 trillion, while the other
7 493 companies are suffering from stagnation and decline.
8 This increasing power of monopolies is used to influence
9 government policies through lobbying, political donations,
10 legal challenges, media control and threats of withholding
11 investment to enact neoliberal policies. Governments are
12 protecting corporate interests by lowering corporate taxes,
13 weakening labour protections, privatising public services
14 and imposing austerity measures. Neoliberal policies not
only increase economic inequality but also erode democratic
institutions, exposing the limitations of liberal democracy.

1 **1.27 Severe Debt Crisis:** As of 2024, 54 countries are in a debt
2 crisis and net resource transfers from developing to
3 developed countries have averaged \$700 billion a year. In
4 the past three years alone, there have been 18 sovereign
5 defaults in developing countries, including Sri Lanka – a
6 greater number than that recorded in all of the previous
7 two decades. An important factor in the sovereign debt
8 distress faced by many countries is the increased
9 prominence of private creditors. Over half of the external
10 debt of low and middle-income countries is owed to private
11 lenders such as banks and hedge funds. In 2022, developing
12 countries paid their external private creditors nearly \$90

13 billion more than they received in disbursements.

1 **1.28** Harmful loan conditionalities imposed by International
2 Financial Institutions (IFIs) like the IMF and high rates of
3 interest are some of the other factors leading to the debt
4 crisis. These debts are a means for the transfer of resources
5 from underdeveloped and developing countries to the rich
6 and developed imperialist countries.

1 **1.29 Artificial Intelligence:** Artificial Intelligence (AI) tools
2 have recently demonstrated significant capabilities in tasks
3 like generating texts, images, and even videos. Unlike
4 humans, AI relies on statistical methods to produce content
5 without understanding the topics they process. These tools/
6 systems have become so powerful today that a large number
7 of white-collar jobs that were thought to be beyond the
8 capability of machines can now be automated. Working
9 people in many sectors will have to fight threats to their
10 jobs. AI systems are deployed to manage access to services
11 and benefits, raising concerns about making crucial
12 decisions on people's lives, without involving people. AI
13 is also being weaponised and used in wars. Big tech
14 companies collect our personal data, including personal
15 data, which is resulting in the violation of the fundamental
16 right to privacy. There is a critical need for robust regulation
17 in AI development to ensure that it serves people's interests
18 and protects their rights.

Escalating Protests

1 **1.30** Growing inequalities, unemployment and poverty have
2 created widespread dissatisfaction and discontent. There
3 have been waves of struggles since 2022, even in many
4 developed countries like the US, the UK, France and
5 Greece, as well as in Portugal, Argentina, Brazil, Kenya
6 and South Africa. A cross-section of people joined these
7 protests in many countries. In our neighbourhood, protests
8 shook Sri Lanka, Bangladesh and Pakistan. Workers and
9 farmers in various countries have organized significant

10 protests against governments' handling of economic crises,
11 social inequality and political corruption. They demand fair
12 wages, better working conditions and greater economic
13 justice.

Growth of the Far-Right

1 **1.31** Exploiting genuine concerns about people's deteriorating
2 living conditions, neo-fascist forces and far-right parties
3 are gaining ground in some countries. They have benefited
4 by rousing feelings of racism, xenophobia and fear of
5 immigration. In the absence of a viable Left political
6 alternative, people's discontent is being used by far-right
7 forces to divide the unity visible during struggles. The anger
8 against established political parties, both Social Democrats
9 and Conservatives, for implementing neo-liberal policies,
10 also led people to shift towards the extreme right, and this
11 helped to ensure the electoral victories of far-right parties.
12 These parties, once in power, not only pursue neo-liberal
13 policies but also encourage the growth of divisive forces
14 that threaten social unity. The political rightward shift noted
15 in the 23rd Congress thus continues and has emerged as a
16 serious threat.

1 **1.32** Incumbent governments that presided over the post-
2 pandemic period have been ousted in many countries.
3 Indeed, it is the first time since the beginning of universal
4 suffrage that all the incumbent parties in developed
5 countries have lost their vote share. Overall, these elections
6 reflect a growing fragmentation and polarisation, with
7 social-democratic, centrist and green parties losing ground
8 to right-wing forces.

1 **1.33** Progressive forces were able to win elections in Colombia,
2 Mexico, Brazil, Sri Lanka and Uruguay, where people voted
3 against anti-people governments. Wherever the Left played
4 an active role in popular protests and was able to
5 differentiate itself from established political parties, they
6 were able to win the confidence of the people and stop the
7 advance of the far-right through their electoral victories.

1 **1.34** However, in many other parts of the world, far-right forces
2 were elected to government. In elections to the European
3 Parliament, far-right parties advanced considerably in
4 several countries. The election of Javier Milei in Argentina,
5 Giorgia Meloni in Italy and Donald Trump in the US reflects
6 the global trend of a rightward political shift. It ushers in a
7 period of economic uncertainties, diplomatic challenges and
8 environmental policy contradictions. Immediately after
9 Donald Trump took office, he made his aggressive and
10 expansionist intentions clear by announcing that his
11 administration would take back the Panama canal from
12 Panama and once again placed Cuba in the list of State
13 sponsors of terrorism. He declared that the new
14 administration will increase tariffs on countries like China
15 and reignite trade wars that will adversely impact the world
16 economy. Trump's presidency will not end wars, as he
17 totally supports Israel and is also against the rise of any
18 country that could challenge US economic power. Trump
19 announced the withdrawal of the US from Paris Climate
20 Accords and also the World Health Organisation (WHO),
21 showing his contempt for international treaties and
22 institutions. He also issued various executive orders for the
23 implementation of his far-right domestic agenda.

Climate Change

1 **1.35** Many of the far-right parties in developed countries that
2 were elected to government are also climate-change deniers,
3 which will negatively affect action to meet the climate
4 challenge. The period from January to September 2024 has
5 been the first almost year-long period in which the global
6 average temperature stayed 1.5° Celsius or more above the
7 pre-industrial average, threatening to breach the desired
8 lower limit set in the Paris Agreement of 2015 for restricting
9 global warming. The CO₂ emissions of the top 1 per cent
10 exceed those of the poorest two-thirds of the world, or five
11 billion people. On the other hand, it is the poor and
12 vulnerable of the Global South who are, and will be, the
13 worst affected.

1 **1.36** The rich, developed countries are not ready to own up to
2 their responsibilities in contributing to the fight against
3 climate change and for the protection of the environment.
4 Developed countries are persisting with the use of fossil
5 fuels, reducing them slowly, while pushing developing
6 countries to adopt expensive renewable energy sources and
7 attempting to restrict their industrial growth and the
8 provision of equitable energy access to their populations.
9 At COP29, which concluded in Baku in 2024, the developed
10 countries offered only \$300 billion to be fully available by
11 2035, as climate finance for developing countries. This so-
12 called ‘deal’ is a pittance that poorer countries have been
13 forced to accept and is a disaster for our planet and
14 communities who are being threatened by flooding,
15 starvation and displacement due to global warming. Instead
16 of providing adequate finance, the developed countries wish
17 to commodify nature further, putting the burden of reducing
18 emissions on the shoulders of small farmers and rural
19 populations. Even the modest gains in global food security
20 are threatened by the push towards a shift to crop production
21 for bio-fuels and energy, which will displace production
22 for food and nutrition.

1 **1.37** Wealthy countries responsible for over 75 per cent of global
2 accumulated emissions since the start of industrialisation
3 have a responsibility to support developing countries and
4 pay them for climate adaptation, the loss and damage caused
5 by the impacts of climate disasters and for a path of
6 development, moving away in a just and equitable manner
7 from fossil fuel dependence to societies based on renewable
8 energy and climate resilience. Rich and developed countries
9 owe trillions of dollars in climate debt annually as
10 reparations to the developing countries. Left and progressive
11 forces should join hands to pressurise advanced capitalist
12 countries to commit to deeper emission cuts and honour
13 their commitments on climate finance and technology
14 transfer.

1 **1.38** The growing debt burden of developing countries, rising

2 inequalities and the refusal to take responsibility for global
3 warming and ensure climate justice are intensifying the
4 contradiction between the rich, advanced capitalist countries
5 and the people of the developing countries.

Our Neighbourhood

1 **1.39** There are momentous developments in our neighbourhood,
2 with many countries witnessing massive popular protests
3 against their respective governments. Many of these protests
4 are led by students and youth, who were joined by all
5 sections of the people. The main demands common in most
6 of these protests are the fight against corruption, rising costs
7 of living, economic crises and authoritarianism. Often,
8 attempts are made to suppress these protests using brutal
9 police and armed forces, but without success.

1 **1.40** In **Bangladesh**, the authoritarian regime of Sheikh Hasina
2 Wajed, who headed the Awami League, fell due to a popular
3 movement led by students. These protests began as a protest
4 against quotas for descendants of freedom fighters but soon
5 spread and assumed a broader character, as a protest against
6 the authoritarian rule of the government. They were met
7 with brutal repression, with hundreds killed in police firings.
8 As the army refused to intervene in support of the
9 government, Sheikh Hasina had to flee to India. Amidst
10 the turmoil and chaos, Islamist fundamentalist forces
11 targeted and attacked minorities to create a communal
12 divide. The secular opposition is also facing targeted attacks.
13 Religious fundamentalist and extremist elements who had
14 been arrested and put in jail were released by the interim
15 government. These developments are giving rise to
16 apprehensions about the proposed changes in the
17 Constitution and the political system.

1 **1.41** The United States and its western allies are trying to
2 intervene and advance their interests. The strategic location
3 of Bangladesh is an important reason for their interest in
4 the country. The democratic forces have to ensure that the
5 rights of minorities are protected. It is also upon them to

6 ensure that the democracy and sovereignty of Bangladesh
7 are safeguarded from all sorts of external influences and
8 pressures. Only by addressing the genuine grievances of
9 the people can they protect the country from falling prey to
10 divisive and imperialist forces. As a country that shares a
11 long land border with India, the developments in
12 Bangladesh are bound to have an impact on our country
13 too.

1 **1.42** In the elections held in **Sri Lanka** for the presidency and
2 subsequently for Parliament, people fed up with the corrupt
3 elites represented by the two main ruling class parties voted
4 decisively for change. A coalition led by the Janatha
5 Vimukthi Perumana (JVP), the National People's Power
6 (NPP), emerged victorious. Anura Kumara Disanayake,
7 JVP leader was elected the executive head of State in Sri
8 Lanka in a historic verdict. In the parliamentary elections,
9 the NPP recorded a resounding victory, where 70 per cent
10 of elected MPs belong to this progressive, Left coalition.
11 This is a very significant and positive development in our
12 region.

1 **1.43** In **Myanmar**, the rule of the military junta is being
2 challenged by armed militias organised along ethnic lines.
3 There is a virtual civil war raging in the country, with the
4 military junta losing control over many parts. The toppling
5 of a democratically elected government, brutal suppression
6 of peaceful protests and the failure of the military
7 administration to resolve growing economic hardships lie
8 at the heart of the conflict between the military and the
9 armed groups. The presence and support of imperialist
10 agencies behind these clashes cannot be ruled out.

1 **1.44** In **Pakistan**, a coalition government of the Pakistan Muslim
2 League-N (PML-N) and Pakistan People's Party (PPP) was
3 formed after the disqualification of Pakistan Tehreek-e-Insaf
4 (PTI). The army is playing a key role and intervening in
5 the functioning of the government. The failure of the
6 government to address the country's economic woes has

7 once again led people to take to the streets, protesting
8 against the government's policies and attitude. Widespread
9 protests were organised demanding the release of Imran
10 Khan, who was imprisoned on various charges.

1 **1.45** The withdrawal of the US from **Afghanistan** led to the
2 formation of the Taliban government, which is gradually
3 being recognised by various countries. The Indian
4 government has slowly established relations with the
5 Taliban. The Taliban are continuing with their reactionary
6 and regressive policies, particularly towards women.

1 **1.46** The relations between the **Maldives** and India nosedived
2 after the election of the new president of the Maldives. He
3 was elected on an anti-India platform, campaigning against
4 the enlarged presence of the Indian military in the Maldives,
5 which was considered an affront to the sovereignty of that
6 country. Efforts are now being made by the Maldives
7 government to restore its relations with India.

1 **1.47** In **Nepal**, the CPN(UML) is heading a coalition government
2 formed along with the Nepali Congress. The formerly
3 unified communist party has once again split into three
4 different factions. The splits in the communist movement
5 have distanced some people from these parties. The pro-
6 monarchy forces are trying to utilise the popular discontent
7 to once again gain acceptance among the people and emerge
8 as an alternative political force. Pro-Hindutva, RSS
9 elements are actively supporting these forces and are
10 campaigning against the newly adopted secular constitution
11 and the communist parties.

Socialist Countries

1 **1.48 China:** The Political Resolution adopted in the 23rd
2 Congress noted that the US has initiated a series of measures
3 in order to not merely 'contain, but also to isolate China',
4 categorising China as a 'strategic rival'. It was further noted:
5 "US-China conflict will have an impact on the central
6 contradiction between imperialism and socialism" (Para

7 1.29). In this period, the US has intensified its efforts to
8 contain and isolate China, but without much success.

1 **1.49** The United States is making every effort to block the access
2 of Chinese high-tech enterprises to key technologies, core
3 equipment and materials by erecting barriers. The US
4 formed a ‘Chip Four-Party Alliance’ with South Korea,
5 Japan and Taiwan in an attempt to exclude China from the
6 global semiconductor supply chain. The Biden
7 administration weaponised trade relations, raised tariffs to
8 ‘ultra-high’ levels and declared a trade war. The US-led G-
9 7 and NATO have openly declared that China is a major
10 threat to their global dominance and vowed to strengthen
11 alliances to contain, isolate and out-compete China.

1 **1.50** In spite of all these attacks and withstanding them, China
2 remains the biggest growth engine of the world economy,
3 with its GDP expanding by 4.8 per cent year on year in the
4 first three quarters of 2024 and on course to realise an annual
5 growth target of around 5 per cent. Its GDP surpassed 126
6 trillion yuan in 2023, an increase of 5.2 per cent. The
7 Chinese currency’s share in global foreign exchange
8 turnover has increased from less than 1 per cent 20 years
9 ago to more than 7 per cent now, signifying its emergence
10 as one of the trusted economic powerhouses. China has
11 decided to strengthen the State-owned sector and ensure
12 that State capital and State-Owned Enterprises get stronger,
13 do better and grow bigger, with their core functions and
14 core competitiveness enhanced. It also announced nearly
15 \$900 billion in stimulus to further reinvigorate its economy.

1 **1.51** More than 150 countries and more than 30 international
2 organisations have joined the Belt and Road Initiative (BRI)
3 of China. The BRI is viewed as an important platform for
4 international cooperation on an equal and mutually
5 beneficial basis. There is also a marked change in China’s
6 approach to international relations. It is now actively
7 involved in various developments and in the resolution of
8 conflicts, such as proposing a plan for ending the war in

9 Ukraine, helping Iran and Saudi Arabia restore relations
10 and bringing together various factions and groups of
11 Palestinian organisations fighting against Israel.

1 **1.52 Vietnam:** Vietnam is one of the fastest-growing economies
2 in the world, with its GDP growth projected at 6.8-7 per
3 cent in 2024. Per capita GDP has reached \$4900 in 2024,
4 up from \$200 three decades ago. Multidimensional poverty
5 rate has come down to around 1 per cent, while
6 unemployment rate is around 4 per cent. The Communist
7 Party of Vietnam (CPV) has decided to crack down on
8 wastefulness and corruption and improve the operational
9 efficiency of State-Owned Enterprises to lead the country
10 on the path of progress.

1 **1.53 Cuba:** The Cuban economy is yet to overcome the economic
2 setbacks suffered due to the Covid pandemic, on top of the
3 tightened economic blockade. Remittances, which are an
4 important source of income, are cut off and due to the
5 sanctions imposed on countries that supply fuel, fuel has
6 become scarce. Cuba is in the process of overcoming all
7 these crises, particularly the scarcity of food, fuel and
8 electricity. It is resisting an intensified attack from US
9 imperialism, which believes the time is ripe for enforcing a
10 regime change and is trying to incite unrest by spreading
11 lies.

1 **1.54 DPRK:** North Korea's economy grew sharply in 2023 after
2 shrinking for three straight years as trade with China
3 increased. Its GDP grew by 3.1 per cent, industrial output
4 by 4.9 per cent (the fastest in seven years), the construction
5 sector by 8.2 per cent (the biggest since 2002) and the
6 agricultural sector grew by 1.0 per cent. The DPRK and
7 Russia agreed to expand cooperation in trade, economy and
8 investment as they signed a mutual defence pact, cementing
9 their ties.

1 **1.55 Laos:** Laos' GDP is expected to grow by 4.6 per cent in
2 2024, surpassing its target, with a boost from the tourism,
3 transport, logistics and energy sectors. Despite significant

4 challenges over the past year, including inflation, exchange
5 rate fluctuations, rising commodity prices, foreign debt
6 burdens and severe floods, the government has managed to
7 sustain economic growth. The Lao People’s Revolutionary
8 Party has prioritised the need to tackle public debt, inflation,
9 exchange rates and rising living costs.

1 **1.56** All through this period, imperialism has increased its attacks
2 on China, Cuba and the DPRK. Imperialism has clearly
3 declared its objective of ensuring a regime change.
4 Communist parties, socialism and Marxism-Leninism are
5 explicitly identified as threats to imperialism. All efforts
6 are being made to demean communist ideology and
7 destabilise these socialist countries, intensifying the central
8 contradiction between imperialism and socialism.

International Communist Cooperation and Anti- Imperialist Solidarity

1.57

1 i) In the background of intensified imperialist aggression,
2 capitalist exploitation and the growth of far-right forces,
3 solidarity and cooperation between communist and workers’
4 parties assume greater significance. Coordinated actions,
5 solidarity movements and mobilising all the forces fighting
6 against imperialism are a priority.

7 ii) The CPI(M) will join hands with all those forces
8 struggling against imperialism and neoliberalism and for
9 the protection of the environment and climate justice.

10 iii) The CPI(M) reiterates its solidarity with the people of
11 Palestine. It stands for the establishment of the State of
12 Palestine with pre-1967 borders and East Jerusalem as its
13 capital.

14 iv) The CPI(M) expresses its solidarity with all the socialist
15 countries – China, Vietnam, Cuba, the DPRK and Laos. It
16 firmly supports their efforts for socialist construction in
17 their respective countries and in the fight against

- 18 imperialism.
- 19 v) The CPI(M) stands with the people of Venezuela,
20 Bolivia, Nicaragua, Colombia, Uruguay, Brazil and other
21 Latin American countries who are resisting imperialist
22 attempts to subjugate them and override their sovereignty.
- 23 vi) The CPI(M) stands with all the people who are fighting
24 against all forms of neo-fascism, terrorism, religious
25 fanaticism, racism, patriarchy, ethnic chauvinism and all
26 sorts of reactionary forces.

National Situation

Main Features of the National Situation

- 1 2.1 Three years after the 23rd Congress, the main features of
2 the national situation are as follows:
- 3 i) The period has seen an aggressive continuation of the
4 Hindutva drive of the BJP government through various
5 State-sponsored activities, such as the inauguration of the
6 Ram temple in Ayodhya in January 2024, the adoption of a
7 Uniform Civil Code by the Uttarakhand BJP state
8 government and the passing of various laws in the BJP-
9 ruled states targeting Muslim minorities, like the prohibition
10 of interfaith marriages and the proposed Waqf (Amendment)
11 Bill in Parliament. At the ground level, there are constant
12 and recurrent instances of violence against Muslim
13 minorities using all religious festival processions and
14 through claims over mosques. This is aimed at creating a
15 permanent communal divide and consolidating an
16 overarching pan-Hindu identity.
- 17 ii) The economic policies pursued by the BJP government
18 have been primarily aimed at facilitating the transfer of
19 resources and assets to big capitalists. A chosen group of
20 big companies has reaped super profits through
21 infrastructure and energy projects. These policies have led

22 to sluggish growth, rising inequalities, unemployment and
23 inflation.

24 iii) The last three years witnessed a heightened attack on
25 democracy and the democratic rights of citizens. The use
26 of Central agencies to file cases and imprison opposition
27 leaders became more brazen, utilising the draconian
28 Unlawful Activities (Prevention) Act (UAPA) and the
29 stringent Prevention of Money Laundering Act (PMLA).
30 Independent media and journalists were also targeted. The
31 curbs on the functioning of Parliament became more severe.

32 iv) The unitary drive of the Centre intensified with further
33 assaults on states' rights; denial of resources to opposition-
34 ruled states; and the interference of Governors in the affairs
35 of state governments becoming more blatant.

36 v) The pro-US foreign policy and strategic ties with US
37 imperialism were strengthened. However, the realities of a
38 growing multi-polar world have compelled the Modi
39 government to make India an active partner in BRICS and
40 the Shanghai Cooperation Organisation (SCO).

41 vi) The period saw various struggles by the working class
42 against privatisation, the imposition of labour codes, for
43 minimum wages and the right to form unions. The united
44 peasant movement continued its struggle for a legal basis
45 for a minimum support price and other demands. There were
46 growing joint activities between Central trade unions (CTU)
47 and the united kisan platform (SKM).

48 vii) The 2024 Lok Sabha election result was a setback for
49 the BJP. It failed to get a majority in the Lok Sabha and has
50 to depend on its NDA partners in the coalition government.
51 However, the BJP seeks to overcome this weakness by
52 pushing ahead with its Hindutva-corporate and authoritarian
53 agenda.

Economic Slowdown

1 **2.2** The GDP growth figures being officially put out are suspect,

2 given the fact that the calculation is based on an implicit
3 inflation rate that is not even a fourth of that emerging from
4 the Consumer Price Index (CPI). Despite such manipulated
5 figures, the fact cannot be hidden that there is an economic
6 slowdown. The advanced GDP estimates for 2024-25 have
7 pegged India's real GDP growth at 6.4 per cent, as compared
8 to 8.2 per cent growth in the previous year. A capitalist
9 recovery from the Covid crisis, based on intensifying the
10 burden on the working people, has, therefore, proved to be
11 extremely short-lived and illusory.

1 **2.3** The reason for this continuing economic crisis is a lack of
2 demand in the economy – that means, the people do not
3 have enough purchasing power in their hands. This is
4 because the vast majority of the Indian people have to live
5 on meagre earnings or wages. Recently released data of
6 household consumer expenditure for 2023-24 shows that
7 the average monthly spending of a four-member family
8 would be only Rs 8,079 in rural areas and Rs 14,528 in
9 urban areas. This is compounded by raging unemployment
10 and inflation, especially of food items, both of which further
11 erode earnings. If there is weak demand, production is kept
12 below capacity and there is no interest in expanding
13 productive capacities through fresh investment. The
14 government's continued lowering of customs duties has led
15 to increased imports, which destroy domestic industry and
16 create an ever-growing trade deficit. Weakness in the
17 economy also catalyses an erosion in the value of the rupee,
18 which, in turn, further increases the cost of imports. There
19 is thus an ever-widening crisis, which the Modi government
20 is clueless about, except for shamelessly manipulating
21 policies to benefit the corporate sector. Meanwhile, a
22 sluggish economy, low incomes, rising costs and rampant
23 joblessness continue to haunt the people, with no support
24 from the government.

1 **2.4** The government is earning more revenues from income tax
2 than from taxing corporates. The percentage of revenue
3 earned from income taxes has increased from 20.8 per cent

4 in 2014-15 to 30.9 per cent in 2024-25. In 2017-18,
5 corporate taxes accounted for almost 32 per cent of gross
6 tax revenues, but they have fallen to 26.5 per cent in the
7 2024-25 budget. Every year, the government is losing nearly
8 Rs. 1.45 lakh crore due to the cut in corporate taxes. This
9 shows the blatant bias of the government towards
10 corporates, even at the cost of cutting down expenditures
11 on the social sector. Despite many government incentives,
12 like the cut in corporate tax, private capital is not ready to
13 invest because there is no demand for the goods produced.
14 The reason for the lack of demand is the stagnation in the
15 real wages of workers.

1 **2.5** The Central government is spending less than 7 per cent of
2 the GDP on the social sector, in contrast to 21 per cent
3 spent by the OECD countries. As a share of the total budget
4 expenditure, the social sector budget outlay for 2024-25 is
5 less than that for 2020-21 by as much as 40 per cent and as
6 a percentage of the GDP, it has exactly halved. As a result,
7 monies allocated for MGNREGA, food subsidy, social
8 welfare, education, health and fertiliser subsidy have all
9 been cut. The lack of government support has added to the
10 increasing costs of living, falling purchasing power and
11 impoverishment.

Transfer of Resources and Corporate Loot

1 **2.6** The Modi government has framed a gamut of policies to
2 restructure the overall economic management to hand over
3 natural resources and public assets to the big capitalists.
4 The National Monetisation Pipeline (NMP) was launched
5 in the 2021-22 budget to hand over the monopoly rights of
6 the highly developed landed properties with corridors like
7 national highways, railways, airports, pipelines,
8 transmission lines, etc., to private capitalists and financial
9 firms in the name of long-term leasing. Massive government
10 investments are being made in infrastructure under the
11 National Infrastructure Pipeline and the five largest
12 corporates are minting a huge amount of money out of these

13 projects. Another feature is the expropriatory routes to hand
14 over the country's natural resources to foreign and domestic
15 private players. The National Mineral Policy 2019 was
16 adopted to auction mineral blocs to private parties to extract
17 natural resources like iron ore, coal and bauxite. The latest
18 move is the amendment to the Mines and Minerals
19 (Development and Regulation) Act, allowing the private
20 sector to mine critical minerals like lithium and cobalt.
21 Finally, through capital investment incentives, a modified
22 special incentive package scheme and various sectoral
23 production-linked incentives, mechanisms have been put
24 in place to directly transfer funds to the corporate kitty.
25 The main beneficiaries are a clutch of big business houses.
26 Five big corporates – Ambani, Adani, Tata, Aditya Birla
27 and Bharti Telecom – own more than 20 per cent of non-
28 financial sector assets. This shows the degree of
29 concentration of wealth and monopolisation taking place.

Intensified Inequality

1 **2.7** India has become one of the world's most unequal countries.
2 According to the World Inequality Report, by 2022-23, the
3 top 1 per cent of the population grabs 22.6 per cent of all
4 income and owns 40.1 per cent of the country's wealth.
5 This is the highest share ever in the history of India, even
6 more than the British Raj era. India's top 1 per cent income
7 share is among the very highest in the world, higher than
8 even South Africa, Brazil and the US. On the other hand,
9 the bottom 50 per cent in India own only 3 per cent of the
10 country's wealth.

1 **2.8** The extreme concentration of wealth during the Modi years
2 is illustrated by the fact that, according to the Forbes List
3 of Billionaires, there were 100 billionaires in 2014, the year
4 Modi became Prime Minister and that number has now
5 doubled to 200 in 2024. Further, the 100 richest of them
6 have a combined wealth which crossed a trillion dollars
7 for the first time. This is the hallmark of ten years of the
8 Modi government's rule.

Agrarian Distress

1 **2.9** Agriculture is the sector that is the worst hit by the neo-
2 liberal and pro-corporate policies of the Modi-led BJP-NDA
3 regime. The National Crime Records Bureau (NCRB) data
4 shows that from 2014 (the first year of the Modi regime) to
5 2022 (the last year for which data is available), 1,00,474
6 farmers and agricultural workers in India were forced to
7 commit suicide, mainly due to indebtedness. In the Global
8 Hunger Index 2024, India is ranked 105th out of 127
9 countries. Some of the basic reasons for the underlying
10 agrarian crisis, which have further aggravated during this
11 period, are: (a) Spiralling costs of cultivation due to cuts in
12 government subsidies and encouragement to corporates in
13 the production of agricultural inputs; (b) No commensurate
14 rise, and often even a fall, in the prices of crops due to the
15 refusal of the central government to implement a
16 remunerative MSP at one and a half times the
17 comprehensive cost of production (C2+50 per cent); (c)
18 Lack of adequate insurance cover to compensate for the
19 huge crop losses due to natural calamities, which are
20 intensifying due to climate change; and the Prime Minister
21 Fasal Bima Yojana (PMFBY) proving to be a farce for
22 farmers and a bonanza for insurance companies, who are
23 making an average gross profit to the tune of 25 per cent;
24 (d) A skewed bank credit policy, which is heavily weighted
25 in favour of corporates and against farmers, driving them
26 into the clutches of rapacious private money-lenders and a
27 debt trap.

1 **2.10** Yet another fundamental reason for the worsening agrarian
2 crisis and the serious plight of the peasantry is the constant
3 slashing of public investment in agriculture and allied
4 sectors. The total allocations for agriculture and allied
5 sectors in the recent Union budget declined from 5.44 per
6 cent in 2019 to 3.15 per cent in 2024. Fertiliser and food
7 subsidies were slashed. The MNREGA allocation is Rs.
8 86,000 crore, less than what was spent in the previous year.
9 Allocations for the PM Kisan Samman Nidhi, the PM Fasal

10 Bima Yojana and other schemes have all been cut. Funds
11 for agricultural R&D and extension services have all dried
12 up to help the MNCs.

1 **2.11** The main focus of the central government is on the
2 corporatisation of agriculture to benefit predatory
3 agribusinesses. Electricity is being privatised, as seen in
4 the Electricity (Amendment) Bill, the smart meter
5 installation drive, the growing clout of Adani Power,
6 Reliance Power, Tata Power, etc., and the massive tariff
7 hikes in power for both rural and urban consumers. The
8 same holds true for the irrigation sector. In the name of
9 digitalisation, the government has launched an all-out
10 assault on the rights of the rural poor, evident in the plight
11 of MNREGA workers. In the last two years, as many as 8
12 crore registered MNREGA workers were de-registered and
13 denied their rightful work benefits, in clear violation of the
14 law. Rural landlessness and inequality in ownership of
15 agricultural land have increased sharply. According to the
16 5th National Family Health Survey (NFHS) conducted in
17 2019-21, 47.8 per cent of rural households did not own any
18 agricultural land; the top 20 per cent of rural households
19 owned 82 per cent of the agricultural land.

1 **2.12** The conditions of the rural poor have worsened with the
2 reverse flow of workers into agriculture. Real rural wages
3 fell by minus 0.4 per cent and real agricultural wages hardly
4 registered any increase with 0.2 per cent growth. The fall
5 in real rural wages is an indication of the intensification of
6 the exploitation of the rural workers by the rural rich nexus.
7 Poor tenant farmers have also borne the brunt of the crisis.
8 The rural distress has led to increasing suicides by
9 agricultural workers. According to the National Crime
10 Records Bureau, 6,087 agricultural workers committed
11 suicide in 2022, an increase from 5,563 suicides in 2021.

Intensified Exploitation of the Working Class

1 **2.13** This period has witnessed an all out assault on the hard-
2 won rights of the working classes. Although the

3 implementation of the notorious four labour codes has been
4 stalled by the strength of the united trade union struggle,
5 the Modi government and many state governments have
6 through their policies ensured exploitative changes in the
7 methods of hiring labour. The process of contractorisation
8 of labour, an essential component of neo-liberal policies,
9 has intensified with the percentage of contract workers in
10 the formal manufacturing workforce increasing from 36.38
11 per cent in 2018 to 40.72 per cent in 2023. This intensified
12 exploitation of labour is reflected in the shocking figure
13 that the growth of wages in the organised sector dropped to
14 just 6 per cent between 2014-15 to 2020-21 compared to
15 the previous six years of a 10.1 per cent growth. Given the
16 high inflation rates, the real wages of workers have thus
17 declined. Another way of looking at the exploitation in the
18 industrial sector is the share of wages in the net value added.
19 This declined by three percentage points from 18.9 per cent
20 in 2020 to 15.9 per cent in 2023. In the same period the
21 share of profits rose to 51.9 per cent of the net value added
22 from 38.7 per cent.

1 **2.14** In most parts of the country minimum wages are not being
2 paid. The number of hours of work is being arbitrarily
3 increased upto 12 hours and more in some states. No
4 overtime is paid. The right to unionise is also under attack,
5 with governments siding with big companies in the name
6 of ensuring ease of business. With decreased bargaining
7 power and the dark shadow of unemployment looming,
8 contract workers are vulnerable to being fired if they dare
9 to organise.

1 **2.15** The expansion of the retail sector with the gig economy
2 services employs 77 lakh workers on contract or as
3 temporary workers, and as freelancers by scores of digital
4 platforms such as Amazon, Flipkart, Swiggy, Zomato, Uber
5 and other companies. There are no mandatory and separate
6 labour laws for this growing workforce leaving them in the
7 most terrible conditions.

1 **2.16** The Central government has set the framework for anti-
2 labour practices in its treatment of its own employees such
3 as scheme workers, a large majority of whom are women.
4 It is shameful that the central government, exploiting
5 women’s desperate need to earn an income, refuses to
6 provide even minimum rights such as a minimum wage,
7 pensions, etc., to the lakhs of workers employed in services
8 such as Anganwadis, Mid-day Meal workers, Asha etc. The
9 Modi government has proved to be the most anti-worker
10 government.

1 **2.17** The horrible plight of migrant workers in India was
2 highlighted during the Covid period where an estimated 12
3 crore workers were severely affected. However, there is no
4 reliable data on the numbers of migrant workers in India,
5 with some official estimates claiming that there is a decrease
6 in their numbers. In fact, given the extent of agrarian distress
7 and the lack of agricultural work, as there is no alternative
8 employment in rural India, the numbers of migrants both
9 in short term circular migration or long term has more likely
10 increased. Despite many promises made after the Covid
11 experience, there is no mitigation of the plight of migrant
12 workers dependent on contractors with little or no
13 government support. Women migrant workers are the worst
14 affected.

Conditions of the People

1 **2.18 Burden of Price Rise:** Continuing rise in prices, especially
2 of essential food items, has devastated household budgets
3 which are already meagre due to the low earnings of
4 working people. In the past three years, while the general
5 price rise, as measured by the Consumer Price Index, was
6 estimated at about 20 per cent, food prices increased by 26
7 per cent. Since most people spend nearly half of their
8 earnings on food, these increases have driven up the cost
9 of living mercilessly. Apart from food, prices of several
10 other essential commodities have been jacked up by the
11 Modi government’s own decisions. For example, prices of

12 several medicines have been allowed to be increased by
13 the government body that is supposed to control prices.
14 The most egregious example of government-driven price
15 rise is in petroleum products. Retail prices of petrol and
16 diesel have been maintained at a high level because of high
17 excise duty imposed by the Modi government, even though
18 international prices of crude oil have fallen by 18 per cent
19 in recent months. Hikes in fuel prices lead to an increase in
20 transport costs, which in turn is borne by the people through
21 higher prices of food items, among others. The cooking
22 gas subsidy was also ended, leading to a huge increase in
23 its price. In short, the government has been squeezing
24 common people through manipulating prices in order to
25 transfer resources either to its own coffers or to big
26 businesses and wholesale traders.

1 **2.19 Unemployment:** The crisis of jobs in the country has
2 worsened in multiple ways in the past few years, with the
3 much-heralded recovery after the pandemic failing to
4 materialise. Government data (PLFS) on unemployment
5 expectedly shows only about a 3 per cent overall
6 unemployment rate in 2023-24, but other estimates, like
7 those of the CMIE, peg it at nearly 8 per cent in September
8 2024, after remaining between 6-9 per cent for the past
9 several months. Even the government is forced to record
10 that among youth (15-29 years), the overall unemployment
11 rate is much higher at over 10 per cent, and even higher at
12 nearly 15 per cent in urban areas. These numbers, however,
13 do not capture the dire situation because most working-age
14 people accept any work, at the most dismal wages and
15 conditions, in order to survive and thus get counted as
16 'employed'. This is nothing but hidden or disguised
17 unemployment. Another grim trend of recent years, which
18 has gathered momentum post-pandemic, is the growth in
19 the share of persons working in agriculture, while the
20 manufacturing sector has seen a decline. Far from providing
21 stable, well-paying and secure jobs, government policy has
22 reversed earlier trends, pushing people back into an already

23 saturated farming sector with its low returns and seasonal
24 work.

Pushing the Hindutva Agenda

1 **2.20** The events in the past three years provide ample proof and
2 confirmation that the RSS agenda to make Hindutva the
3 State ideology and transform the secular-democratic
4 Republic into a Hindu Rashtra is being pursued
5 systematically. Central to this project is targeting the
6 Muslims as the ‘other’ to create an overarching pan-Hindu
7 identity. The inauguration of the Ram temple at Ayodhya
8 in January 2024 became a State-sponsored event, with the
9 Prime Minister himself conducting the religious rituals. The
10 next step has been to target the Gyanvapi mosque in
11 Varanasi and the Eidgah in Mathura to establish legal
12 disputes on these two sites by claiming that there were
13 Hindu temples existing there. This was the original VHP
14 slogan that the three sites in Ayodhya, Kashi and Mathura
15 should be handed over to Hindus to build temples. Local
16 courts have entertained suits and ordered surveys of the
17 premises of the mosques to ascertain whether any temples
18 existed before. This was facilitated by judicial connivance
19 at the highest level when the then Chief Justice of India,
20 D.Y. Chandrachud, allowed surveys to go on, stating that
21 this does not violate the provisions of the Places of Worship
22 Act, 1991. This has now led to a chain of legal cases – in
23 Sambhal and Ajmer.

1 **2.21** Taking out religious processions during festivals like Ram
2 Navami, Hanuman Jayanti and Ganesh Puja, entering
3 minority areas and causing provocations leading to clashes,
4 have become a regular feature, particularly in BJP-ruled
5 states. In all these incidents, it is the members of the minority
6 community who face police repression. The use of
7 bulldozers to demolish houses of Muslims, initiated in Uttar
8 Pradesh, has spread to Madhya Pradesh, Rajasthan, Delhi,
9 etc. What is now evident is that such targeting of minorities
10 during Hindu festivals is not a random occurrence but a

11 regular feature to create polarisation and make the
12 communal divide permanent. Hindutva extremist groups
13 indulge in violence with impunity against minorities and
14 they get State support, with the victims being penalised.

1 **2.22** BJP-ruled states in this period have further enacted laws
2 targeting the minorities and making some of the existing
3 laws more stringent. In Uttar Pradesh, for instance, interfaith
4 marriage called as ‘love jihad’ will now incur life
5 imprisonment. New terms like ‘land jihad’ and ‘food jihad’
6 have been coined to facilitate Muslim baiting. The BJP
7 government in Assam has gone farther than most other
8 governments in this regard. Even in states with tiny Muslim
9 populations like Uttarakhand, calls for Muslim shopkeepers
10 to shut down shops and calls for boycotts of Muslim traders
11 have taken place.

1 **2.23** The Hindutva forces are targeting Christians also in their
2 anti-minority campaign. In 2024, there were 834 incidents
3 of violence against Christians, up from 734 incidents in
4 2023. Attacks on churches, prayer meetings, ostracisation
5 and filing of criminal cases using stringent anti-conversion
6 laws are some of the ways the Christians are harassed. RSS-
7 affiliated organisations are conducting campaigns against
8 Christian adivasis with the demand to de-schedule all
9 adivasis who have converted, so that they cannot avail of
10 the Scheduled Tribe status.

Authoritarianism Reinforced

1 **2.24** The 23rd Congress Political Resolution had noted the
2 consolidation of authoritarianism by various anti-
3 democratic measures. The last three years have seen an
4 intensification of these trends. Further steps were taken to
5 curtail Parliament, weaken the higher judiciary and erode
6 the independent status of the Election Commission.

1 **2.25** Parliament saw the virtual suspension of the opposition.
2 Important issues of public concern were not allowed to be
3 discussed, such as ethnic violence in Manipur. In an

4 unprecedented step, 146 Members of Parliament of the
5 opposition from both Houses were suspended during the
6 winter session in 2023. Important Bills were not sent to the
7 parliamentary committees for scrutiny and were railroaded
8 through the passage. The new Parliament building was
9 inaugurated by the Prime Minister with Hindu
10 religious rituals and a 'Sengol' placed behind the Speaker's
11 Chair.

1 **2.26** Draconian laws like the UAPA and the PMLA were used
2 against opposition leaders, either to make them defect to
3 the BJP or to put them in jail. For the first time in our
4 political history, two Chief Ministers of Jharkhand and
5 Delhi were arrested and put in jail in the run-up to the Lok
6 Sabha polls. Arrests and detention of journalists and
7 targeting of independent media continued. The three
8 criminal laws to replace the earlier criminal codes have
9 come into force after having been passed in Parliament
10 without discussion. These three laws have enhanced the
11 powers of the police in terms of custodial remand and
12 broadened stringent clauses like sedition without naming
13 the offence as such. The Telecommunications Act has come
14 into force, which strengthens the surveillance structure,
15 infringing on the citizens' right to privacy.

1 **2.27** Reinforcing the authoritarian architecture, the government
2 has sought to tame the higher judiciary by refusing to
3 implement the recommendations of the Supreme Court
4 collegium in many cases concerning the appointment of
5 High Court judges or Chief Justices of High Courts. More
6 and more, the higher judiciary is acting like an 'executive
7 judiciary'.

Election Commission Undermined

1 **2.28** The Election Commission has seen a steady whittling down
2 of its autonomous status. The Act on the appointment of
3 the Chief Election Commissioner and other Election
4 Commissioners, passed by Parliament, is contrary to the
5 direction of the Supreme Court, giving the executive a

6 majority in the selection committee. The Election
7 Commission has stopped intervening when it comes to
8 communal campaigning by the BJP leadership. The EC is
9 also becoming pliable to the executive's directions on the
10 scheduling of elections. The conduct of elections has
11 become non-transparent, with various unexplained
12 outcomes such as a wide gap between polled votes and votes
13 counted; additions and deletions in the voter's list; and the
14 functioning of EVMs.

1 **2.29** The electoral bonds scheme, which institutionalised corrupt
2 corporate funding to the ruling party, was struck down by
3 the Supreme Court in 2024 as unconstitutional. This ruling
4 vindicated the stand of the CPI(M), which had not only
5 declared, at the outset, that it would not accept electoral
6 bonds but also challenged the scheme in the Supreme Court.
7 Notwithstanding the scrapping of electoral bonds, huge
8 amounts of money are deployed during elections, at various
9 levels, to influence voters and vitiate the polling process.
10 The politician-business nexus is the source of these illegal
11 funds. The question of electoral reforms has assumed
12 urgency in such a situation where decisive measures are
13 required to curb money power in the electoral system.

Dismantling Federalism

1 **2.30** The Modi government continued its drive to centralise all
2 powers, dismantling the federal framework and
3 delegitimising the federal principle. Through a combination
4 of measures – political, economic and fiscal – the Modi
5 government has redefined the power dynamics between the
6 Central government and the states. The Centre, through
7 measures such as reducing the divisible pool of taxes, denial
8 of resources to the states and non-continuation of GST
9 compensation, has created a fiscal crisis for many
10 opposition-ruled states. The states' share of Central tax
11 transfers has declined. This is reflected in the reduction of
12 the allotment of funds for the states' share of the divisible
13 pool in Central budgets over the years. While it stood at

14 41.1 per cent in 2016, it came down to 35.1 per cent in
15 2023. The Centre's increasing reliance on non-divisible
16 cesses and surcharges has reduced the overall divisible pool
17 of tax revenue shared with the states. With shrinking
18 resources, the states are then faced with increasing
19 restrictions on borrowing. This prevents them from raising
20 resources for developmental activities and welfare
21 measures.

1 **2.31** After the advent of the Modi government for the second
2 term, there was a steady increase in the intervention by
3 Governors in opposition-ruled states. The Governors began
4 encroaching on the powers of the state government and
5 legislature. Arbitrary appointments of Vice-Chancellors,
6 denial of approval for legislations passed by the assembly
7 and efforts to bypass the state government by summoning
8 senior officials have become common occurrences.
9 Governors are being used to undermine the basic structure
10 of Centre-State relations. Further, by insisting that a scheme
11 with minimal Central assistance be branded as a Central
12 scheme and threatening to cut off funds to other schemes,
13 the Centre seeks to appropriate the developmental schemes
14 of the states.

1 **2.32** That the BJP will continue with its centralisation drive is
2 evident from its pursuit of the 'One Nation, One Election'
3 (ONOE) system. The government has introduced a
4 Constitutional Amendment Bill and another Bill in
5 Parliament for simultaneous elections to the Lok Sabha
6 and all state assemblies. Such a system will seriously
7 curtail the rights of the states and the Constitutional
8 guarantee of a five-year term. The ONOE will lead to
9 authoritarian centralisation.

1 **2.33** It is the twin forces of Hindutva and big corporates that
2 are fueling the centralisation drive. It is, therefore,
3 important to make the defence of federalism and state
4 rights a part of the anti-authoritarian, anti-Hindutva
5 struggle. All non-BJP state governments should be

6 mobilised to present a united front to defend the states’
7 rights.

Jammu and Kashmir: Symbol of Assault on Democracy and Federalism

1 **2.34** What has happened in Jammu and Kashmir is a symbol of
2 the extreme anti-democratic, anti-federal approach of the
3 BJP government. After the abrogation of Article 370 and
4 the dismantling of the state of J&K in 2019, state repression
5 and denial of the rights of citizens of the union territory
6 became the norm. Measures to remove the domicile status
7 of the permanent residents and their land rights were
8 undertaken. Delimitation was done in a way to diminish
9 the representation of the Valley in the new assembly. The
10 Supreme Court, by dismissing the challenge to the
11 abrogation of Article 370 and the dismantling of the state
12 of J&K, struck a blow against federalism and the rights of
13 elected state legislatures.

1 **2.35** Finally, when elections were held for the assembly in
2 September 2024, despite all the machinations of the BJP,
3 the National Conference-led alliance won a clear majority
4 and the Omar Abdullah government has taken over with
5 very limited powers. However, the assurance of statehood
6 by the Centre to the Supreme Court is yet to be fulfilled.
7 Meanwhile, in Ladakh, there is a popular movement for
8 acquiring Sixth Schedule status and autonomy. The aim
9 of the secular-democratic forces is to achieve statehood
10 immediately while continuing the struggle for the
11 restoration of special status.

Manipur: Deepening Divide

1 **2.36** Even twenty months after the ethnic violence erupted in
2 Manipur on May 3, 2023, the situation remains dire.
3 Heinous acts such as arson, rape, kidnapping and murder
4 of innocents were committed. The conflict has so far left
5 250 people dead and 60,000 displaced people are living in
6 camps. Both the state and Central BJP governments have

7 failed to restore normalcy and bring peace to the state.
8 Prime Minister Modi has not visited Manipur even once
9 and Chief Minister Biren Singh has not been removed,
10 despite widespread anger over his partisan role in the
11 conflict. Apart from the belated deployment of security
12 forces, no significant steps have been taken to initiate
13 dialogue with representatives of the people, political
14 parties and various ethnic groups involved in the conflict.
15 This lack of action by the Central government has hindered
16 the restoration of confidence among the people and the
17 creation of conditions necessary for peace and harmony.

1 **2.37** The Centre seems oblivious to the dangerous consequences
2 of its inaction, which could escalate the conflict in Manipur
3 and threaten peace across the entire north-eastern region.
4 The Central government must immediately intervene to
5 remove Biren Singh as Chief Minister and initiate dialogue
6 with all sides in the conflict to ensure that the rights of all
7 communities are safeguarded and peace and normalcy
8 restored.

Foreign Policy and Strategic Ties with the US

1 **2.38** Close coordination with the US marked the foreign policy
2 of the Modi government in its second term and that is
3 bound to continue with Trump assuming the Presidency.
4 With the exception of the Ukraine-Russia conflict, where
5 India has sought to take a neutral position, India's foreign
6 policy has been broadly aligned with the geopolitical
7 designs of the US. India's stand on Ukraine got grudging
8 acceptance from the United States because it gives greater
9 importance to India's role in the anti-China alliance in the
10 Asia-Pacific region. The QUAD was upgraded to the level
11 of leadership summits and the Modi government
12 acquiesced in the US efforts to convert the QUAD into a
13 security and strategic alliance. India became a critical part
14 of the US' defence and security orbit with the signing of
15 the Critical and Emerging Technology (2022) and the
16 Security of Supply Arrangements and Reciprocal Defence

17 Procurement Arrangement (2023) pacts. Over the past
18 seven years, India has bought arms worth \$15 billion from
19 the US.

1 **2.39** The USA-India-Israel axis has resulted in the shameful
2 support for Israel in its genocidal war against Gaza. India
3 has abstained on resolutions supporting the Palestinian
4 cause in the UN General Assembly. Moreover, India is
5 exporting arms and ammunition to Israel, which is used
6 for the conduct of its war in Gaza. The I2U2 (India, Israel,
7 US and UAE) and IMEC (India-Middle East-Europe
8 Economic Corridor) are two pro-US groupings that are
9 floated with an aim to align Indian foreign policy with
10 that of the US, particularly in West Asia. India's
11 membership in BRICS and the SCO is a recognition of
12 the growing multi-polarity in the world. But its strategic
13 ties with the United States are detrimental to India utilising
14 all the opportunities that the growing multi-polarity
15 provides.

Shrinking Educational Access

1 **2.40** Education has suffered the severest assault during the last
2 three years. The most defining feature of this attack has
3 been the severe erosion of access to education. Thousands
4 of government schools have been closed down in the name
5 of 'viability', in complete contravention of the Right to
6 Education Act, which mandates schools in the
7 neighbourhood. With notable exceptions like Kerala, the
8 privatisation drive is leading to an exodus of pupils from
9 government schools to private schools. The same principle
10 has been applied to undergraduate institutions, resulting
11 in a sharp increase in college dropout rates. The
12 government's overall drive to reduce allocation and
13 expenditure for the social sector, through defunding and
14 underfunding, has been a key factor in this adverse
15 development. This new policy thrust has been facilitated
16 by the large-scale and protracted lockdown of educational
17 institutions in the aftermath of the Covid-19 pandemic.

1 **2.41** Another aspect of this attack is the broader assault on
2 science, scientific temperament and rational thinking.
3 Belief-based content has been promoted, a hallmark of
4 moves towards authoritarian and fascistic principles. This
5 direction not only fosters communal and identity-based
6 hate-mongering but also redefines the democratic and
7 secular identity of the republic and its citizens along
8 Hindutva-oriented lines. This shift has been particularly
9 evident in the appointment and capture of specialised
10 policy bodies and institutions, extending up to universities
11 and other higher education establishments.

1 **2.42** The large-scale resource gap caused by the withdrawal of
2 government funding is now being filled by extensive
3 corporate investment for profit. This has resulted in the
4 substitution of teacher-student-driven physical interaction
5 with digital instruction, leaving the educational process
6 entirely at the mercy of digital platforms promoted by
7 education corporates.

1 **2.43** The implementation of the National Education Policy 2020
2 has been accompanied by the extreme centralisation of
3 the sector's management, decisively undermining federal
4 principles. A key element of this centralisation has been
5 the misuse of the post of Chancellor, with Governors acting
6 as instruments to push the agenda of the central
7 government, in clear contravention of the constitutional
8 scheme. The UGC Draft Guidelines seek to vest the
9 Chancellor with the selection of the Vice-Chancellors of
10 state universities. Further, in many states, student unions
11 are not allowed in colleges and universities.

Privatising Healthcare

1 **2.44** India has been facing several adversities related to public
2 health in recent times. The already lowest public share in
3 health financing of all major economies has been further
4 lowered and the out-of-pocket burden has increased.
5 Corporatisation and profiteering of health care and medical
6 education have grown to unbelievable levels. Publicly paid

7 private care has become the norm through insurance
8 schemes like PMJAY, institutionalising corruption, while
9 public health care infrastructure and services have got
10 weaker. The public sector pharma and health technology
11 sector have been systematically weakened, whereas poorly
12 regulated corporate chains are gaining a monopoly. Even
13 R&D has been handed over to private sector cronies,
14 including for vaccines. Occupational health challenges are
15 mounting, including in the gig economy. Digitisation and
16 related techno-centric reforms are further marginalising
17 already deprived populations. People's health outcomes,
18 especially for the poor, are worsening, even as the public
19 health system is sharply deteriorating. All this is happening
20 despite the disastrous experience that India had during the
21 Covid pandemic, which thoroughly exposed the
22 bankruptcy of the public health system in the country.

1 **2.45** Despite health being a state subject, hurdles are being
2 created for those states trying to strengthen public health
3 systems by undermining fiscal federalism. The BJP
4 government is unleashing false claims and propaganda on
5 health status and health care while shutting down avenues
6 for seeking accountability. The much-needed periodic
7 health surveys have been maligned and compromised. In
8 the pharmaceutical sector, the government continues with
9 policies that promote super-profits for corporates by
10 allowing huge increases in the prices of essential non-
11 patented medicines and not challenging the exorbitant
12 prices that MNCs charge for patented drugs. The struggle
13 for people's right to health and for universal access to
14 publicly funded healthcare must be carried forward as part
15 of alternative policies.

Onslaught on Culture

1 **2.46** The RSS has increased its hold on cultural and research
2 institutions by infiltrating them with its elements. They
3 seek to rewrite Indian history from a communal standpoint,
4 and to project mythology as real history. The role and

5 contributions of non-Hindus to Indian history and culture
6 are undermined and negated. The secular and progressive
7 legacy of social reform and the National Movement is
8 being tarnished. A false sense of pride is promoted using
9 fake narratives. The Hindutva communal agenda cannot
10 succeed until it becomes part of the ‘common sense’ of
11 the people at large. For this, propagation via popular culture
12 is crucial. Thus their unrelenting efforts to infiltrate and
13 control the film industry, television channels and OTT
14 platforms, popular music, and even, of late, high art. The
15 projection of what were regional or local religious festivals
16 on an all-India scale is also part of this effort to create a
17 homogenous ‘Hindu’ identity. The attacks on reason and
18 undermining of rationality have continued apace.
19 Obscurantism, superstition, feudal values, patriarchy,
20 misogyny, and ideas of caste ‘purity’ and ‘pollution’ are
21 the soil in which Hindutva communal ideology grows and
22 thrives. Irrational and unscientific theories and discourses
23 are today getting state backing and are promoted via
24 cultural and intellectual institutions. Countering the
25 Hindutva agenda in the cultural sphere requires a sustained
26 and coordinated effort of all secular and progressive
27 cultural groups and institutions.

Media Captured

1 **2.47** The mainstream media, with a few exceptions, have been
2 brought under control of the ruling party and the Central
3 government. The owners of the corporate media have lined
4 up with the government and their TV channels spew out
5 communal propaganda. Independent media and digital
6 media platforms are being intimidated. The targeting of
7 *NewsClick* by the police and Central agencies was meant
8 to serve as a warning. There are constant efforts to regulate
9 and censor the media as seen by the IT Rules Amendment
10 2023, of which certain provisions have been stayed by the
11 Bombay High Court. India now ranks 159 out of 180
12 nations in the Press Freedom Index of 2024.

Women: Difficult Plight under BJP Rule

1 **2.48** The Modi government betrayed the women of India by
2 creating a drama of adopting the Women’s Reservation
3 Bill in Parliament but delaying its implementation
4 indefinitely. This was done by wrongly and unnecessarily
5 linking it to the much-delayed census and the long-drawn-
6 out delimitation process. As a result, the numbers of women
7 in assemblies and parliament in India continue to be among
8 the lowest in the region.

1 **2.49** In this period, several state governments have tried to build
2 a female support base through a money transfer scheme
3 of 1000 to 1500 rupees into the bank accounts of women.
4 Such is the acute economic distress of the average woman
5 that even such small amounts make a considerable
6 difference in the lives of women and have a political impact
7 on voting patterns. Our interventions must be sensitive to
8 the positive response to such schemes among the mass of
9 women. The approach of the BJP is to turn women from
10 the holders of constitutional equal citizenship rights to
11 mere ‘beneficiaries’ dependent on such schemes. Even
12 while helping women to access such schemes, it is
13 necessary to strengthen the struggle for women’s rights,
14 including the recognition of their work which is critical
15 for family survival.

1 **2.50** In fact, the cruel reality is the huge unpaid work done by
2 the women of India in both domestic work and in unpaid
3 agricultural work on family-held land or small enterprises.
4 According to a recent Ecowrap report from the State Bank
5 of India, the total contribution “of unpaid domestic work
6 by women in GDP would be 22.7 lakh crore rupees, which
7 is 7.5 per cent of India’s GDP.” Rising prices, high rates
8 of female unemployment and the reduction of funds for
9 MNREGA, leading to the reduction of workdays, have
10 had a disastrous impact on women, causing them to take
11 loans at high rates of interest and forcing them into a debt
12 trap often at the mercy of rapacious MFIs.

1 **2.51** In the decade of Modi government rule, crimes against
2 women have increased by 28 per cent. The NCRB reports
3 that in 2022, on average, every hour there were 50 crimes
4 committed against women and every day 88 women were
5 raped. Of them, 11 were dalit women. The conviction rates
6 are dismal, with 75 accused in every 100 cases of rape
7 going free. In so many prominent cases, such as in the
8 female wrestlers' case, the BJP governments have openly
9 defended the accused. India under the BJP is one of the
10 most unsafe countries for women.

1 **2.52** Twelve 'double-engine' state governments have adopted
2 laws that eliminate a woman's right to choose her partner
3 if the partner happens to be of another religious community.
4 The UCC adopted in Uttarakhand and presented as a model
5 by the BJP criminalises consensual sexual relationships,
6 as in live-in relationships and goes against the basic and
7 fundamental right of an adult woman to decide the way
8 she will live her life. The BJP keeps on stressing that tribal
9 communities will be kept out of the ambit, thus proving
10 that the UCC is not for women's rights but to target the
11 Muslim community. The BJP has proved to be a strong
12 opponent of women's rights in both its ideological
13 approach and its practice, both of which promote
14 patriarchy.

Youth: Unfulfilled Hopes

1 **2.53** With youth comprising 65 per cent of the total population,
2 how their needs and aspirations are catered to will
3 determine the future direction of the country. A vast mass
4 of youth, who are minimally educated, find their future
5 prospects blighted by the lack of employment
6 opportunities and quality jobs which can fulfill their
7 aspirations for a better life. The recent years have seen
8 mass protests by educated youth regarding the holding
9 of defective civil service examinations and leakage of
10 question papers. The Agniveer scheme also saw tens of
11 thousands coming out in protest against the denial of

12 regular service in the armed forces. The concentration
13 on getting government and public sector jobs of the lower
14 categories is because of the bleak prospects of
15 employment elsewhere. Much of the jobs are in the
16 informal sector with no income or social security. The
17 type of education that is available to the bulk of the youth
18 is also mediocre and does not equip anyone to pursue a
19 worthwhile career or vocation.

1 **2.54** There is a vacuum in the social and cultural life of the
2 younger generation. Instead of absorbing healthy and
3 progressive social and cultural values, they are fed with
4 crass commercial-consumerist and egoistic values. Under
5 the Hindutva regime, there is a constant injection of
6 virulent communalism and divisiveness. It is essential to
7 provide the youth with an alternative programme, which
8 meets the needs for a sound education, quality employment
9 and a fulfilling social and cultural life. While projecting
10 such a political platform, the Left must set out the socialist
11 ideal before the youth, which alone can effect a basic
12 transformation in society.

Dalits: Deteriorating Conditions

1 **2.55** The RSS-BJP-Hindutva forces are systematically
2 promoting Manuvadi ideologies in the garb of sanatan
3 dharma. They seek to draw dalits and marginalised castes
4 into the Hindutva framework through manipulation of caste
5 identities even while retaining caste hierarchies. They
6 cynically exploit sub-caste identities to divide oppressed
7 castes and increase their influence. An intrinsic part of
8 their strategy have been attempts to use oppressed caste
9 communities against minorities on a communal basis.
10 Countering these tactics requires large scale mobilisation
11 against the caste system, caste based oppression, for social
12 justice and prevention of the reversal of social reform.

1 **2.56** Caste-based atrocities have risen in the Manuvadi
2 environment created by the BJP and Hindutva forces.

3 NCRB data shows that crimes against Scheduled Castes
4 (SCs) increased by 13 per cent between 2021 and 2022.
5 Uttar Pradesh leads with 26 per cent of cases, followed by
6 Rajasthan (15 per cent) and Madhya Pradesh (14 per cent).

1 **2.57** Acceleration of privatisation under the Modi government,
2 lack of reservations in the private sector and
3 informalisation of employment have weakened the
4 Constitutional mandate for reservations. As of 2022, SC
5 unemployment rate was 8.4 per cent and 84 per cent of
6 SCs were in informal employment – the highest among
7 all groups. The Modi government abandoned Special
8 Component Plans, allocating only 10.6 per cent of Central
9 scheme funds to SCs between 2019 and 2024, far below
10 the mandated 15 per cent. Of this, only 3.3 per cent went
11 to targeted schemes, with just 80 per cent utilisation.
12 Overall, in this period, the socio-economic conditions of
13 the dalits have deteriorated further.

Assault on Adivasis

1 **2.58** The BJP government has used its majority in Parliament
2 to push through amendments to various laws and rules
3 which hit hard at even the inadequate protections afforded
4 to adivasis, including, most importantly, the right to self-
5 governance. These include amendments to the Forest
6 Conservation Act and its rules, which have eliminated the
7 very word ‘gram sabha’; amendments to the rules of the
8 Forest Rights Act and the Mining and Minerals
9 Development laws, which have done away with the
10 mandatory requirement of free and informed consent of
11 adivasis for projects in the areas inhabited by them;
12 amendments which give permission to mining companies
13 in the name of mining exploration without the consent of
14 the gram sabha; dilution and violation of the land for land
15 policy for acquisition of land occupied by adivasis, to name
16 a few. This is apart from the blatant violation of existing
17 laws and provisions like the Fifth and the Sixth Schedules
18 of the Constitution and PESA, which protect adivasi land.

19 Thus, the basic and fundamental right of adivasis for jal,
20 jangal, zameen is under severe attack. Large numbers of
21 adivasis are facing displacement because of these policies.
22 Since much of the country's natural wealth is in areas
23 inhabited by adivasis, any provisions in laws which
24 guarantee adivasi rights in these areas adversely affect the
25 interests of corporates. In this sense, it is corporates vs
26 adivasis and the government has sided clearly with the
27 corporates.

1 **2.59** Because of privatisation in many critical and strategic
2 sectors such as defence, mining, power, irrigation and so
3 on, it is powerful, unscrupulous, unregulated private
4 companies which are coming into adivasi areas with
5 various projects. In many adivasi areas, governments are
6 promoting tourism resorts on land taken over illegally by
7 private promoters. Privatisation policies have converted
8 the very concept of public purpose to justify land
9 acquisition to an open corporate purpose policy. Further,
10 the policy of privatisation is accompanied by deregulation,
11 which also has a direct bearing on jobs, as private
12 companies do not guarantee provision of jobs to project-
13 affected families as was done earlier. Thus, in areas of
14 new mining and other projects by private companies, the
15 terms and conditions of the so-called compensation
16 packages for loss of tribal land and forest are being
17 determined and implemented by these companies. For
18 mining activities alone, 18,922 hectares of forest land have
19 been diverted between 2019 and March 2024.

1 **2.60** Because of the policies of privatisation, reservation in
2 education and government employment has been severely
3 affected. This is in addition to the growing backlog in
4 vacancies. Recent data shows a fall in ST employees in
5 Central government departments and undertakings. In the
6 public sector, 25,000 jobs reserved for STs have been
7 eliminated; in school education, there are 35,000 fewer
8 ST teachers than there were in 2018. The Central
9 government has refused to extend reservations to all

10 contract or outsourced jobs.

Disabled Continue to Suffer

1 **2.61** Neo-liberal policies have had a deleterious effect on the
2 already pitiable living conditions of India's disabled
3 population. Budgetary allocations for the nodal department
4 as also for Mental Health have not only remained more or
5 less stagnant over the last many years but have also
6 witnessed an underutilisation of even the allocated funds.
7 This has severely impeded the implementation of rights
8 based legislations and policies.

Heading to Environmental Disaster

1 **2.62** Under successive BJP-led governments, India's
2 environment and related people's rights and well-being
3 are under assault as never before. Crony capitalists and
4 large corporations, including MNCs, are expanding
5 mining, exploration and extractive industries,
6 infrastructure and commercial activities in ecologically
7 sensitive areas, including inside forests and wildlife
8 habitats, damaging ecosystems as well as the lives, habitats
9 and livelihoods of tribals, forest dwellers and others
10 dependent on natural resources. Human-animal conflicts
11 are growing due to the shrinkage of habitats for wildlife.
12 Steps to mitigate such conflicts are not being done in a
13 planned and holistic manner. The BJP's pursuit of the 'ease
14 of doing business' has meant the dismantling of
15 environmental regulations, permitting projects in hitherto
16 protected areas and weakening regulatory agencies and
17 mechanisms. Quality forests are being lost on a large scale,
18 which the government is hiding through falsified and
19 misrepresented data. Massive infrastructure, hydro-power
20 and road projects in the fragile western and eastern
21 Himalayan regions in the name of development and
22 tourism have exacerbated climate impacts such as extreme
23 rainfall and have rendered these regions highly vulnerable
24 to landslides, subsidence of towns and recurrent floods,
25 leading to much loss of life and livelihoods every year.

26 Unplanned urbanisation is adding to the environmental
27 problems.

1 **2.63** Climate change impacts are causing enormous harm all
2 over the country to people and infrastructure, resulting in
3 damage to health and recurrent large-scale economic
4 losses. India is experiencing more intense and longer-
5 duration heat waves. Construction and other outdoor
6 workers, street vendors, farm labour, domestic help, gig
7 workers and those living in informal settlements are the
8 worst affected. Public health systems in most parts of the
9 country are not geared to provide necessary assistance and
10 longer-term measures have not been thought of. Urban
11 areas are worse affected due to the heat-trapping effects
12 of concretised urban infrastructure. Urban flooding caused
13 by extreme rainfall, exacerbated by mismatched drainage
14 systems and haphazard urbanisation, now occurs almost
15 every year even in metro cities, causing enormous losses
16 to the tune of tens of thousands of crores. State
17 governments and urban local bodies are starved of funds
18 to deal with these problems due to fiscal over-centralisation
19 by the Union government.

Struggles and Resistance

1 **2.64** An important initiative in the period after the Kannur
2 Congress was the nationwide worker-peasant convention
3 in Delhi on August 24, 2023, organised jointly by the
4 Samyukta Kisan Morcha (SKM) and the Central Trade
5 Unions (CTU). A joint charter of demands of the workers
6 and peasants of India was adopted. Lakhs of workers and
7 peasants all over the country took part in its struggle call
8 of Mahapadavs in all state capitals for three days from
9 November 26 to 28, 2023. On February 16, 2024, the CTU
10 gave a call for a nationwide industrial/sectoral strike, which
11 was supported by the SKM with a rural hartal. On March
12 14, 2024, the SKM held a nationwide farmers' rally in
13 Delhi. Again, on November 26, 2024, large actions at the
14 district level were held across the country by the SKM
15 and the CTU.

1 **2.65** Along with this broad joint worker-peasant initiative, the
2 trade union, kisan and agricultural workers' fronts have
3 been coordinating well for several joint actions. In and
4 after 2022, they held large joint nationwide actions of
5 several thousand people. These included a joint national
6 convention at Delhi on September 5, 2022, a Delhi rally
7 on April 5, 2023 and state-level Mahapadavs and other
8 actions from August 9-14, 2023. All the above joint actions
9 helped to promote the objective of worker-peasant unity
10 in action.

1 **2.66** Several trade union struggles took place during this period.
2 The 37-day strike by Samsung workers in Tamil Nadu for
3 the right to form a union and get it recognised resulted in
4 victory. Strikes of electricity workers and employees
5 against privatisation of electricity distribution took place
6 in Uttar Pradesh, Haryana, Maharashtra, Jammu &
7 Kashmir, Chandigarh and Puducherry and they were
8 partially successful. Prolonged strikes and large rallies of
9 scheme workers like Anganwadi, ASHA, Mid-day Meal
10 took place in several states and many of them achieved
11 partial success. Strikes and struggles also took place in
12 the bank, insurance, central and state government, postal,
13 coal and telecom sectors and also among medical
14 representatives.

1 **2.67** The kisan organisation took up crop-based struggles,
2 struggles for procurement centres, crop insurance, land
3 rights, forest rights and against the wild animal menace. It
4 has taken up the political and legal battle against the tyre-
5 cartel in support of the rubber farmers. The agricultural
6 workers' front led several struggles on issues like
7 MNREGA, wages, land, housing and caste discrimination.
8 On October 11, 2023, lakhs of agricultural workers took
9 part in the All India Protest Day against the policy attacks
10 on MNREGA by the BJP Central government. The
11 women's front led several struggles on issues of price rise,
12 strengthening of the public distribution system (PDS) and
13 against increasing crimes and violence against women. On

14 October 5, 2023, a nationwide rally of thousands of women
15 was held at Delhi. The student's front has been in the
16 forefront of protests against the National Education Policy
17 (NEP), commercialisation of education, fee hikes and
18 closure of schools. A joint platform called United Students
19 of India was formed and it held large rallies in Delhi,
20 Chennai and Kolkata. The youth front has been active on
21 the issue of unemployment, the Agniveer scheme and other
22 issues.

1 **2.68** Some of the major and sustained struggles during this
2 period, which mobilised thousands of people, include the
3 struggle against the rape and murder of a doctor in the R
4 G Kar Hospital in West Bengal; local struggles for house
5 sites in Telangana; land struggles in Bihar; against the
6 privatisation of the Visakhapatnam Steel Plant and for
7 rehabilitation of the Polavaram project-affected people in
8 Andhra Pradesh; for crop insurance in Rajasthan; against
9 displacement in Jharkhand; for vesting forest lands in the
10 names of adivasis in Maharashtra; and pattas for house
11 sites in Tamil Nadu.

Position of Political Parties

1 **2.69 BJP:** The BJP, which is the political front of the fascistic
2 RSS, has emerged as the dominant political party in the
3 past one decade. It has become the main representative of
4 the big bourgeois-landlord classes and it has consolidated
5 its support, particularly of the big corporates. The BJP
6 has brought about a right consolidation using the influence
7 of Hindutva ideology, an alliance with big business and
8 the use of unprecedented money and media power.

1 **2.70** Overall, the BJP has been adopting a three-pronged strategy
2 to fight elections: (i) Aggressive use of Hindutva issues to
3 create polarisation and consolidate pan-Hindu identity, (ii)
4 Engineering caste and sub-caste alliances for electoral
5 gains, and (iii) Use of State-funded direct cash transfer
6 schemes to cultivate beneficiaries. In the state assembly
7 elections held in the past three years, the BJP was able to

8 regain Rajasthan and Chhattisgarh, ousting the incumbent
9 Congress governments. It also retained the Madhya
10 Pradesh government after winning the assembly elections
11 decisively. The BJP lost the Karnataka and Himachal
12 Pradesh assembly elections, where it had governments.
13 It was also defeated in the Jammu and Kashmir and
14 Jharkhand assembly elections after the Lok Sabha
15 election.

1 **2.71** The BJP suffered a reverse in the Lok Sabha election by
2 getting only 240 seats. However, this loss must be seen
3 in perspective. The BJP got only 1.1 per cent less vote
4 share than in the 2019 election. The BJP also made new
5 gains, like in Odisha, where it swept the Lok Sabha polls
6 (winning 20 out of 21 seats) and winning the state
7 assembly election for the first time and forming a
8 government there. The party made gains in the southern
9 states mainly by increasing its voting percentages. The
10 victory of the BJP in Haryana and the BJP-led alliance
11 in Maharashtra in the post-Lok Sabha election period
12 shows that the BJP is still able to regroup and recoup the
13 losses it had suffered in these two states during the
14 Parliament election.

1 **2.72** The RSS provides the underpinning for the BJP as a
2 political party and the coordination and joint work of the
3 parent organisation and its political front have been
4 strengthened in this period. The supremacy of the Modi-
5 Shah duo continues, with all power in the party
6 organisation being concentrated in their hands.

1 **2.73 Congress:** The Congress was able to improve its strength
2 in the Lok Sabha from 44 to 100, benefitting by having
3 allies in the INDIA bloc. It has been able to gain Muslim
4 minority support in a substantial manner all over the
5 country. The Congress base has not expanded significantly.
6 It has been defeated in Rajasthan, Madhya Pradesh,
7 Chhattisgarh and Haryana in the Assembly elections in
8 the North. In states like Punjab, Odisha and Assam, it has

9 been considerably weakened. It is in the South that the
10 Congress has made gains, with victories in the Karnataka
11 and Telangana assembly polls and forming governments
12 there.

1 **2.74** The Congress has not changed its economic policy
2 direction. It talks against crony capitalism, but adheres to
3 the very same neo-liberal policies which spawn such
4 cronies. While its national leadership is taking a more
5 forthright position against the Hindutva agenda, there are
6 still vacillations and a tendency to compromise when faced
7 with the aggressive offensive of the BJP and its Hindutva
8 allies. The Congress party represents the same class
9 interests as the BJP. However, being the main secular
10 opposition party, it has a role to play in the struggle against
11 the BJP and in the broader unity to be forged of the secular
12 forces. The attitude of the CPI(M) to the Congress is
13 determined by this need for broader unity of the secular
14 forces. However, the Party cannot have a political alliance
15 with the Congress.

1 **2.75 Regional Parties:** The regional parties can be divided
2 broadly into three categories. The first are those parties
3 which are consistently opposed to the BJP. They are parties
4 like the DMK, SP, RJD, NCP, AAP and JMM. Secondly,
5 there are parties which are allied with the BJP and are in
6 the NDA, like the JD(U), TDP, JD(S), AGP, Jana Sena
7 and some smaller parties. The third category of parties are
8 those which have not opposed the BJP or the Central
9 government when they were in power in the states, like
10 the BJD, AIADMK and YSRCP. The BRS began by
11 extending support to the Centre but then shifted as it
12 perceived the threat of the BJP in Telangana. It is to be
13 noted that all these three parties have lost their governments
14 after the recent assembly elections.

1 **2.76** The Trinamool Congress in West Bengal is an autocratic
2 party based on a criminal-corrupt-political nexus which is
3 virulently anti-Communist. It is electorally opposed to the

13 BJP and seeks to maintain the binary of the TMC versus
14 BJP to marginalise the CPI(M) and the Left.

1 **2.77** The regional parties, which are opposed to the BJP, had an
2 important role to play in the broader opposition unity that
3 has been forged and they will continue to play that role in
4 the coming days.

1 **2.78** Muslim fundamentalist and extremist organisations like
2 the Jamaat-e-Islami and the SDPI (political wing of the
3 Popular Front of India) are working to expand their
4 influence among the Muslim masses. They seek to utilise
5 the alienation and fears among the minority community,
6 who are subject to constant attacks by the Hindutva forces.
7 In Kerala, they target the CPI(M) to curb the latter's
8 influence among the minorities. Though minority
9 communalism cannot be equated with the Hindutva
10 communal forces who are in power, it must be understood
11 that extremist minority activities only strengthen the forces
12 of majority communalism. The Left and democratic forces
13 should firmly defend the rights of the minorities and rally
14 them to the secular platform while countering the
15 fundamentalist forces.

Counter Hindutva

1 **2.79** The Party must be geared up to conduct sustained activities
2 in the political, ideological, cultural, economic and social
3 spheres to counter the activities and influence of Hindutva
4 and the various RSS outfits. It must be reiterated that the
5 BJP-RSS cannot be isolated and defeated only through
6 electoral battles. Given the fact that in the past one decade
7 the Hindutva forces have created a substantial support base,
8 based on their ideological influence, it is necessary to have
9 a comprehensive programme to counter Hindutva.

1 **2.80** For this, the Party and the mass organisations should:

2 i) Mobilise all intellectual resources and prepare material,
3 which can be used for the multimedia campaign to expose

- 4 the pernicious propaganda and the activities of the
5 Hindutva forces.
- 6 ii) Integrate the anti-Hindutva campaigns and struggles
7 with the campaigns and struggles against economic
8 policies and people's issues.
- 9 iii) Pay special attention to organise anti-communal work
10 through social and cultural activities among the working
11 class and in the working class residential areas by the Party
12 and the trade unions.
- 13 iv) Counter efforts to rewrite history and introduce
14 communal content in the educational system.
- 15 v) Work among believers to explain the difference
16 between religious faith and misuse of religion for political
17 aims. Intervene in festivals and social gatherings to prevent
18 their use for communalisation.
- 19 vi) Involve in social service activities, popular science
20 movements, promote secular and scientific thinking and
21 broad-based cultural activities to counter Manuvadi and
22 obscurantist values.

Increase the Strength of CPI(M)

- 1 **2.81** The 18th Lok Sabha election review has underlined the
2 urgent necessity to expand the independent strength of the
3 Party, as the election results show that the Party's mass
4 base and influence have not grown. To achieve this, the
5 following steps have to be taken:
- 6 1. The Party's work among the basic classes should be
7 given priority. The weakness of struggles of the rural poor
8 against the exploitation by the rural-rich nexus must be
9 overcome. There should be concrete studies on the issues
10 on which such struggles can be conducted. The Party has
11 to expand its influence among the workers in the organised
12 sector in the manufacturing and strategic industries and
13 give importance to organising the contractual workers in

14 the organised sector. The Party should pay attention to
15 fostering worker-peasant unity and united actions.
16 Focussed efforts to undertake the anti-Hindutva campaign
17 among the basic classes and to politicise those rallying
18 behind struggles should be undertaken.

19 2. The Party should pay more attention to the independent
20 political campaign and mass mobilisations around the
21 political platform of the Party. There should be no blurring
22 of our independent identity or diminishing our independent
23 activities in the name of electoral understanding or
24 alliances. Special attention should be paid to the
25 ideological work and campaign to counter the ideology
26 and activities of the RSS-Hindutva forces.

27 3. The importance of taking up mass and class issues for
28 local struggles on a sustained basis should be underlined.
29 The lag in this regard should be overcome. Higher
30 committees should orient the local units and branches
31 towards this. Innovative and imaginative forms of struggles
32 and movements should be worked out instead of
33 stereotyped forms of protest.

34 4. The Party should directly campaign and conduct
35 struggles on issues of social and caste oppression and
36 gender discrimination. The struggles against social
37 oppression should be linked with the struggles against class
38 exploitation.

39 5. The Party's political platform and demands should
40 address the issues relevant to the youth and the campaign
41 that 'Socialism is the Alternative' should be specifically
42 addressed to them.

43 6. A significant increase in the strength of the Party
44 requires the rebuilding and expansion of the Party and the
45 Left in West Bengal and Tripura. In West Bengal, while
46 conducting mass struggles and movements, special
47 attention should be paid to work among the rural poor and
48 organising them. The Party has to focus more on the

49 political and ideological fight against the BJP while
50 opposing both the TMC and the BJP. In Tripura, the Party
51 should strengthen the grassroots organisation and take up
52 a programme which will unite the working people while
53 addressing the special needs and issues of the tribal people.

54 7. **Kerala** is the biggest unit of the Party with a powerful
55 mass base. The LDF government, in its second successive
56 term, has been working against heavy odds due to the
57 Centre's hostile attitude and the concerted campaign of
58 all anti-Communist forces in the state. The Lok Sabha
59 election results have shown weaknesses in our political
60 and ideological work to counter the BJP. These should
61 be overcome. The government is committed to eliminate
62 extreme poverty and to provide housing for all. Even
63 though the state is facing a financial crisis due to the
64 discriminatory approach of the Central government, the
65 government is prioritising its expenditure for the welfare
66 measures oriented towards the poor and the working
67 people.

Left Unity

1 **2.82** Because of the preoccupation with forging broader unity
2 for the Lok Sabha elections, there was a lull in united Left
3 actions in this period. The Left parties gave a joint call
4 twice to protest against the Israeli war of aggression in
5 Gaza. There has to be a renewed thrust for Left unity and
6 united actions to project the Left's alternative policies.
7 The Left's increased intervention in national politics will
8 strengthen the united struggles against the divisive and
9 harmful policies of the Modi government.

Left and Democratic Alternative

1 **2.83** After over three decades of neo-liberal and pro-big
2 bourgeois-landlord policies pursued by successive
3 governments at the Centre and the dangerous corporate-
4 communal-authoritarian rightward shift of the last one
5 decade, it has become even clearer that the only real

6 alternative to the present bourgeois-landlord order is the
7 Left and Democratic Alternative. The CPI(M) will
8 endeavour to build a Left and Democratic Front which
9 can meet the aspirations and defend the interests of the
10 working class, peasantry, artisans, small shopkeepers,
11 middle class and intelligentsia. The priority must be for a
12 strong Left and Democratic Front forged through sustained
13 mass and class struggles for alternative policies.

1 **2.84** The Left and Democratic Programme should have the
2 following components:

3 1. Measures to strengthen democracy, secularism and
4 federalism in the Constitutional set-up. For this:

5 ● Separation of religion and State to be embedded in the
6 Constitution.

7 ● Removal of all laws and provisions which curb
8 democratic rights and civil liberties.

9 ● Restructure Centre-State relations and effective
10 democratic decentralisation.

11 2. For a self-reliant and pro-people path of development:

12 ● Strict regulation of international finance flows;
13 nationalise mining and natural oil resources; planned
14 development and balanced growth.

15 ● Reduction of economic and social inequalities; check
16 on monopolies and promotion of the public sector; fiscal
17 and taxation measures for redistribution of wealth.

18 ● Thoroughgoing land reforms and democratic
19 transformation of agrarian relations; legalise payment of
20 a remunerative MSP for all crops; liberation of the
21 peasantry from debt; Central legislation for agricultural
22 workers on wages and social security; develop agriculture
23 based on collective intervention such as cooperative
24 farming, production and marketing.

- 25 3. Rights of Working People:
- 26 ● Right to livelihood, gainful employment, fair wages,
27 housing and social security; recognition of trade unions
28 through secret ballot; representation of workers in
29 management, repeal of the four labour codes.
- 30 ● Universalise and expand the public distribution system
31 for food and all essential commodities.
- 32 ● Universal old age pension.
- 33 4. Education and Culture:
- 34 ● Ensure right to education, allocate 6 per cent of GDP
35 for education; expand and strengthen public education
36 system; universalise ICDS.
- 37 ● Develop universal public health care system with State
38 funding; reduce prices of essential drugs.
- 39 ● Promotion of a secular and democratic culture and
40 equality of all languages listed in the Eighth Schedule of
41 the Constitution.
- 42 5. Social Justice:
- 43 ● Abolish the caste system and all forms of caste
44 oppression; protection of rights of dalits, adivasis and
45 minorities.
- 46 ● Equal rights for women in all spheres; equal wage for
47 equal work and stringent measures on crimes against
48 women.
- 49 ● Assure rights of persons with disabilities and protect
50 the rights of sexual minorities.
- 51 6. Electoral Reforms and Environment:
- 52 ● Firm measures to curb high-level corruption; electoral
53 reforms, introduction of proportional representation with
54 partial list system.

- 55 ● Protection of the environment, reducing emission of toxic
56 gases; promotion of renewable energy; ensure energy
57 equality for all.
- 58 7. Foreign Policy:
- 59 ● An independent foreign policy based on opposition to
60 imperialist hegemony; reversing all strategic and defence
61 agreements with the United States.

Political Line

- 1 **2.85** The nearly eleven years of the Modi government's rule
2 have resulted in the consolidation of the rightwing,
3 communal, authoritarian forces with neo-fascist
4 characteristics. The Modi government represents the
5 alliance of Hindutva forces and the big bourgeoisie. Hence,
6 the prime task is to fight and defeat the BJP-RSS and the
7 Hindutva-corporate nexus underpinning it.
- 1 **2.86** Isolating and defeating the BJP and the Hindutva forces
2 requires a continuous struggle against the Hindutva
3 ideology and the activities of the communal forces. The
4 Party must strive for the broadest mobilisation of all secular
5 forces against Hindutva communalism.
- 1 **2.87** The success of the struggles against the Hindutva neo-
2 liberal regime requires the growth of the independent
3 strength of the CPI(M) and the Left forces. It also requires
4 the integration of the struggle against Hindutva
5 communalism and the struggle against neo-liberal policies.
- 1 **2.88** The fight against the Modi government and the BJP must
2 be carried out by conducting class and mass struggles
3 against the pro-corporate, neo-liberal policies which have
4 intensified the exploitation of the working people and
5 adversely affect their livelihoods and living conditions.
6 The Party should be at the forefront in opposing crony
7 capitalism, the loot of national assets and large-scale
8 privatisation.

1 **2.89** The Party will cooperate with INDIA bloc parties in
2 Parliament and, on agreed issues outside Parliament. The
3 Party will join hands with all secular democratic forces
4 on issues of authoritarian onslaughts against democracy,
5 the use of draconian laws to suppress dissent and the
6 opposition to efforts to subvert the Constitution and the
7 institutions of the State.

1 **2.90** The Party will cooperate with those regional parties which
2 are firmly opposing the BJP. Where such regional parties
3 head state governments, the Party will support any policy
4 which benefits the people, but will oppose and mobilise
5 people against policies that adversely affect the working
6 people.

1 **2.91** The Party will support united platforms and united actions
2 of the class and mass organisations. It should make all
3 efforts to draw in the masses following the bourgeois
4 parties for united actions.

1 **2.92** While prioritising the development of the independent
2 strength of the Party, there should also be efforts to revive
3 and strengthen Left unity. United Left campaigns and
4 struggles must highlight the alternative policies of the Left.
5 The Party should work to rally all Left and democratic
6 forces, including mass organisations and social
7 movements, to constitute a Left and democratic platform
8 and programme.

1 **2.93** Appropriate electoral tactics can be adopted as per the
2 above political line to maximise the pooling of anti-BJP
3 votes.

Tasks

1 **2.94** (1) The Party should step up its campaigns and struggles
2 against the neo-liberal economic policies, Hindutva
3 communalism and authoritarian attacks on democracy.

4 (2) The Party should develop and intensify struggles of
5 the rural poor, working class and urban poor on livelihood

- 6 issues, land, food, wages, house sites, social security
7 benefits and employment opportunities.
- 8 (3) The Party should strive for the broadest unity of all
9 secular-democratic forces against Hindutva communalism.
- 10 (4) The Party should consistently stand for the protection
11 of democracy, democratic rights and civil liberties. It
12 should cooperate to forge wider unity against authoritarian
13 attacks to suppress dissent and opposition, misuse of
14 Central agencies and subversion of Constitutional bodies.
- 15 (5) The Party should actively take up the fight against all
16 forms of caste oppression and discrimination. The Party
17 should champion the rights of women, dalits, adivasis and
18 religious minorities. The Party should pay special attention
19 to work in tribal areas.
- 20 (6) The Party should work to raise the anti-imperialist
21 consciousness of the Indian people and mobilise popular
22 opinion against the Modi government's pro-US foreign
23 policy and strategic alliance with the US.
- 24 (7) The Party should rally forces for the defence of the
25 rights of states and for federalism. It must take up the
26 defence of the LDF government in Kerala and support its
27 efforts to implement pro-people policies.
- 28 (8) The Party should work for building a Left and
29 Democratic Front and project a Left Democratic
30 Programme as an alternative. This must also be linked to
31 the campaign for Socialism as the Alternative – a socialism
32 in tune with Indian conditions.

Rise up to Meet the Challenges

- 1 **2.95** To fulfill the above tasks, it is absolutely essential to
2 greatly enhance the independent strength of the Party.
- 3 ● The Party has to take on the BJP-RSS politically,
4 ideologically, culturally and organisationally.
5

6 ● The Party has to resolutely wage the struggle of the
7 workers, peasants, rural labour and all other sections of
8 the working people against exploitation under the neo-
9 liberal order.

10 ● The Party has to rally all the Left and Democratic forces
11 to present the real alternative before the people.

1 **2.96** Let the entire Party take the political and ideological
2 message of this Resolution to the people of India! Let us
3 march forward to build a strong all-India party with an
4 organisation that has deep roots among the people! Based
5 on the glorious traditions of the Communist movement, we
6 are confident that we shall rise up to meet the challenges
7 before us!
